

## ***VI. Revenue from Federal Offshore Leases***

---

Revenue contributions from Federal leases of adjacent States are shown in table 63. Annual and cumulative mineral revenue from the OCS mineral leasing program are shown in table 64. Revenue by commodity is shown in tables 65 and 66. The OCS mineral leasing program generates revenue from the following sources:

- Bonus bids paid on tracts at lease offerings;
- Annual rental payments on leases not in production;
- Minimum royalties assessed on producible leases that are not actively producing;
- Shut-in payments on producible gas wells closed temporarily because of mechanical, safety, or other problems; and
- Royalties paid on sales of crude oil, condensate, natural gas, oil lost, gas lost, gas plant products, sulphur, and salt.

The major sources of OCS revenue are bonuses, and oil and natural gas royalties, which accounted for 93 percent of total OCS mineral revenue in 1995. Royalties paid for crude oil, condensate, and natural gas were the top contributors to OCS revenue in 1995. Crude oil, condensate, and natural gas royalties made up 78 percent of total OCS mineral revenue in 1995, with natural gas royalties being responsible for 41 percent of total mineral royalties.

In 1995, lease sale bonuses totaled about \$414 million, which was about 14 percent of OCS revenue. This was about four times the combined contribution of rental payments and minimum royalties. Over the life of the program, bonuses have played a much larger role, generating 51 percent of OCS mineral revenue since 1953, compared to 47 percent from crude oil, condensate, and natural gas royalties.

Tables 67 through 78 show annual OCS revenue generated by adjacent State or planning area. Leases offshore Louisiana have generated more revenue than any other State both in 1995 and over the life of the program. In 1995, OCS leases offshore Louisiana generated 76 percent of total OCS revenue. Since 1953, OCS leases offshore Louisiana have been the source of 66 percent of total OCS revenue.

Footnotes at end of table.

Table 64. All Coastal States: Annual and Cumulative Mineral Revenue and Sales Value from Federal Offshore Leases, pre-1954-95 — *continued*

- 
- <sup>1</sup> Royalties for condensate are included in the oil and gas royalties. Data for condensate are reported separately in Section V. (Federal Offshore Oil and Natural Gas Sales Volume and Royalties).
- <sup>2</sup> Other Mineral Revenue includes the 1960-91 royalties for gas lost (\$13,974,637), oil lost (\$136,094), sulphur (\$68,126,448), gasoline and LPG (\$542,208,495), and salt (\$174,287).
- <sup>3</sup> No monies from Sale PH (12/15/61) are reported as Federal revenue in this table (See table 3).
- <sup>4</sup> Escrow funds distributed to the State of Louisiana and lessees, pursuant to decrees of the U.S. Supreme Court, are not deducted from the Cumulative Mineral Revenues reported in this table.
- <sup>5</sup> Federal Percent Share is the Federal Government's share of the mineral revenues from the competitive leasing and private development of Federal oil and gas and other leases on the OCS. The percentage figure represents Cumulative Mineral Revenue divided by Cumulative Sales Value. Sales value for royalty purposes means the mineral's monetary worth at the time of its production, not its current sale price.
- <sup>6</sup> As adjusted, this 1981 figure now includes \$10,846,000 paid in 1984 for leases on five tracts. Timely issuance of those leases was held up, pending resolution of litigation.

<sup>1</sup> These royalties include \$718,124 paid for gasoline and LPG, \$67,125 paid for gas lost, and \$1,668 for sulphur.

<sup>2</sup> The 1981 bonuses reported here include payments of \$10,846,000 from Sale 53 for five leases that could not be issued until 1984 because of litigation. In the same sale, certain bidders relinquished their rights to lease 12 other tracts and forfeited \$41,081,734 or one-fifth of the \$205,408,672 they had bid for those tracts.
