Environmental Fact Sheet

EPA EXPANDS COMPREHENSIVE PROCUREMENT GUIDELINE (CPG)

As part of its continuing program to promote the use of recovered materials, the U.S. Environmental Protection Agency (EPA) is expanding the federal buy-recycled program by adding 18 new items to its Comprehensive Procurement Guideline (CPG). This brings to 54 the number of recycled-content products designated for a purchasing preference under the CPG. EPA originally issued the CPG and the non-regulatory Recovered Materials Advisory Notice (RMAN) in May 1995. RMANs provide purchasing recommendations and guidance for the products designated in the CPG and are updated periodically to reflect market conditions.

In November 1997, EPA updated the original CPG with the publication of CPG II and RMAN II covering an additional 12 items. In January 2000, EPA issued CPG III and RMAN III, covering 18 new items. Updated RMANs for paper and paper products were published in May 1996 and June 1998. See page 4 of this fact sheet for all pertinent *Federal Register* citations.

The CPG designates items in the following eight product categories: paper and paper products, vehicular products, construction products, transportation products, park and recreation products, landscaping products, nonpaper office products, and miscellaneous products.

Why Did EPA Publish the CPG and RMANs?

To encourage the use of materials recovered through recycling, and thereby help to reduce the amount of waste that must be disposed of, Congress directed government agencies to increase their purchases of recycled-content products. Section 6002 of the Resource Conservation and Recovery Act (RCRA) requires EPA to designate products that can be made with recovered materials and to recommend practices for buying these products. Once a product is designated, procuring agencies are required to purchase it with the highest recovered material content level practicable. President Clinton reinforced RCRA's buy-recycled requirements when he issued Executive Order (EO) 13101 in September 1998.

Who Is Required to Buy Recycled Products?

Under RCRA, the requirement to purchase an EPA-designated product containing recovered materials applies to "procuring agencies" that spend more than \$10,000 a year on that item. Procuring agencies include all federal agencies, and any state or local agency or government contractor that uses appropriated federal funds. For example, if a county agency spends more than \$10,000 a year on an EPA-designated item, and part of that money is from appropriated federal funds, then the agency must purchase that item made from recovered materials.

CPG Categories and Designated Items

(Items in bold were designated in CPG III)

Paper and Paper Products	Running Tracks		
Vehicular Products	Landscaping Products		
Engine Coolants	Food Waste Compost		
Re-refined Lubricating Oils	Garden and Soaker Hoses		
Retread Tires	Hydraulic Mulch		
Construction products	Lawn and Garden Edging		
Building Insulation Products	Plastic Lumber Landscaping Timbers and Posts		
Carpet	Yard Trimmings Compost		
Carpet Cushion	Nonpaper Office Products		
Cement and Concrete Containing Coal Fly Ash	Binders (plastic covered, chipboard, and pressboard)		
Cement and Concrete Containing Ground	Office Recycling Containers		
Granulated Blast Furnace Slag	Office Waste Receptacles		
Consolidated and Reprocessed Latex Paint	Solid Plastic Binders		
Floor Tiles	Plastic Clipboards		
Flowable Fill	Plastic File Folders		
Laminated Paperboard	Plastic Clip Portfolios		
Patio Blocks	Plastic Presentation Folders		
Railroad Grade Crossing Surfaces	Plastic Desktop Accessories		
Shower and Restroom Dividers and Partitions	Plastic Envelopes		
Structural Fiberboard	Plastic Trash Bags		
Transportation Products	Printer Ribbons		
Channelizers	Toner Cartridges		
Delineators	Miscellaneous Products		
Flexible Delineators	Awards and Plaques		
Parking Stops	Industrial Drums		
Traffic Barricades	Manual-Grade Strapping		
Traffic Cones	Mats		
Park and Recreation Products	Pallets		
Park Benches and Picnic Tables	Signage		
Plastic Fencing	Sorbents		
Playground Equipment			
Playground Surfaces			

Affirmative Procurement Program

Affirmative procurement—or buying recycled— is an agency's strategy for maximizing its purchases of EPAdesignated items. The affirmative procurement program should also ensure that designated items purchased are composed of as much recovered materials as possible. Programs should be flexible enough to incorporate newly designated items, and must consist of the following components:

- A recovered materials preference program.
- An agency promotion program.
- A program for requiring vendors to reasonably estimate, certify, and verify the recovered materials content of their products.
- A program to monitor and annually review the effectiveness of the affirmative procurement program.

Additionally, within one year following EPA designation of an item, procuring agencies must revise their specifications to require the use of recovered materials to the maximum extent possible without jeopardizing the intended end use of the item. The May 1995 RMAN provides general guidance for developing affirmative procurement programs. In addition, technical background documents and supporting analyses to each CPG update include detailed guidance on establishing affirmative procurement programs. See page 3 of this fact sheet for information on accessing these and other helpful resources.

Preference Program

A *preference program* is the system by which an agency implements its stated preference for purchasing products containing recovered materials. RCRA identifies three options for preference programs:

- **Minimum Content Standards** specify the minimum amount of recovered materials that designated items should contain. EPA recommends ranges of recovered materials content that are currently available, and procuring agencies should establish their own standards based on these ranges.
- **Case-by-Case Policy Development** is used when a procuring agency determines that minimum content standards are inappropriate for a specific procurement action. This option allows the procuring agency to establish a separate recovered materials content requirement for the specific procurement action, while still enabling the agency to procure the designated product with the highest amount of recovered materials practicable.
- Substantially Equivalent Approaches, such as establishing service contracts for product remanufacturing, are used when minimum content standards are inappropriate. For example, procuring agencies may establish service contracts for remanufacturing toner cartridges.

Promotion Program

Agencies must actively advertise their desire to buy recycled content products, both within their organizations and to product vendors. Internal promotion usually is a broad-based employee education and outreach program that affirms an agency's procurement policy through advertising, workshops, agency newsletters, and technical and staff manuals. Examples of external promotion to suppliers include publishing articles in trade journals, participating in vendor shows or trade fairs, placing statements in bid solicitations, and discussing an agency's procurement policy at bidders' conferences.

What Are the Estimation, Certification, Verification, and Monitoring?

Agencies should use standard contract provisions to estimate, certify, and, where appropriate, reasonably verify the recovered materials content in a product procured by an agency. Programs also must be monitored and tracked to ensure that they are fulfilling their requirements to purchase items composed of recovered materials.

May an Agency Purchase CPG Items That Do Not Contain Recovered Materials?

Agencies may elect not to purchase designated items containing recovered materials when the cost is unreasonable; inadequate competition exists; items are not available within a reasonable period of time; or items do not meet reasonable performance specifications. Sections 402(c) and 502(c) of EO 13101 require agencies to provide written justification for non-compliant procurements.

Does the Federal Acquisition Regulation (FAR) Address Purchasing of Products Designated in the CPG?

Under RCRA section 6002, purchasing of EPA-designated items must be consistent with other federal procurement requirements. The FAR is the primary regulation used by federal executive agencies in their acquisition of supplies and services. On August 22, 1997, a final rule was published in the *Federal Register* (62 FR 44809) amending the FAR to reflect the federal government's preference for the acquisition of environmentally sound and energy-efficient products and services and to incorporate the requirements of RCRA section 6002. The FAR revisions include solicitation provisions, clauses for obtaining certifications and estimates of recovered materials content from contractors, and a requirement that agencies establish an affirmative procurement program for EPA-designated items. The FAR can be accessed electronically at <www.arnet.gov/far>; then select the section that includes Part 23.

Are Items Designated in the CPG Environmentally Preferable Products?

EO 13101 directs federal agencies to identify and purchase environmentally preferable products, which are products that have a lesser or reduced effect on human health and the environment when compared to other products and services that serve the same purpose. Items listed in the CPG are designated based on recycled content, whereas the criteria for environmentally preferable products include multiple attributes such as energy use; conservation of resources; impacts on air, water, and land; and use of toxic or hazardous constituents.

For More Information

This fact sheet and other documents on the CPG program are available on the Internet at <www.epa.gov/cpg>. CPG documents and copies of *Federal Register* notices are also available via e-mail from the RCRA Information Center. Address e-mails to: rcra-docket@epamail.epa.gov. Include the requestor's name and mailing address on all orders.

For additional information or to order paper copies of CPG documents, call the RCRA Hotline and reference the EPA document number indicated in the table below. Callers within the Washington Metropolitan Area must dial 703-412-9810 or TDD 703-412-3323 (hearing impaired). Long-distance callers may call 1-800-424-9346 or TDD 1-800-553-7672. The RCRA Hotline operates weekdays, 9:00 a.m. to 6:00 p.m., est.

Federal Register notices can also be found at <**www.epa.gov/fedrgstr/search.htm**>. Search by specific day, by keywords, or by accessing the Government Printing Office database.
