Foreword

In September 1978, the Residential Solar Data Center (SDC) of the National Bureau of Standards (NBS) issued the publication, "Grant Application Reports" (SDC Report No. 2), a listing of eight sorts of Grant file data collected from Cycles 1, 2 and 3 of the Department of Housing and Urban Development's (HUD) Residential Solar Demonstration Program. In March 1979, the SDC issued an updated draft of the same eight types of sorts on data from Cycles 1, 2, 3, 4 and 4A. These publications received selected distribution to participants (primarily HUD and its contractors) in the Residential Solar Demonstration Program.

In October 1979, NBSIR 79-1923 Residential Solar Data Center Grant Reports was issued, containing four of the eight computer sorts, significantly reducing its size so that it might be more easily distributed to a larger audience [1]*. The publication also has a complete description of the set of data elements included in the computer reports and a description of the relationship between the Grant file and other files maintained by the Solar Data Center.

This document, also titled Residential Solar Data Center Grant Reports, is a final update of the 1979 document. These data are from all grant cycles--1, 2, 3, 4, 4A, 5 and P1 and are now available in nine computer sorts. The newest sort has been added here to the four contained in the original report. Sample pages of the detailed listing of all data are also included in this update.

*Numbers in brackets pertain to references on page 133.

Residential Solar Data Center
Grant Reports

Patricia M. Christopher
Lynne L. Charlton

National Bureau of Standards
Washington, D.C. 20234

The Residential Solar Data Center project staff in the Center for Building Technology, National Bureau of Standards has been responsible for the establishment and operation of a computerized data base containing non-instrumented residential data generated by the Solar Heating and Cooling Demonstration Program sponsored by the Department of Energy (DoE) and the Department of Housing and Urban Development (HUD). This document includes computer reports of data contained in the Grant file, one of six computer files comprising the data base. These computer reports contain data recorded on applications submitted to HUD by organizations or individual builders who applied for grants to build solar energy systems in new and/or existing homes. Approximately 668 grants have been awarded in six award cycles.

Key Words: automatic data processing; computer reports; grant data; residential buildings; solar data base; solar energy system; solar hot water, space heating and cooling.

1. Introduction

This report addresses a computer file of data called the Grant file and the computer reports (listings, printouts, graphs, etc.) that are produced from this file of data. Included is a description of the Grant file and its relationship to other files of data in the same data base, along with information about how data was collected. Also included are: a detailed description of certain data elements, a description of computer reports produced from the Grant file, and copies of some of these computer reports. Chapter 5 contains a series of bar graphs produced from the same data shown in the computer reports.

2. Grant File

The Grant file is one of six computer files which comprise the solar data base (see figure 1) established and maintained by the Residential Solar Data Center (SDC) project staff at the National Bureau of Standards. This computerized data base contains data collected for the Residential Solar Heating and Cooling Demonstration Program administered by the Department of Housing and Urban Development (HUD), a major activity in the total Federal Solar Energy Program managed by the Department of Energy (DoE)[2].

Grant file data were initially obtained from completed forms submitted to HUD by organizations or individual builders applying for grants to build solar systems in new homes or to retrofit solar systems into existing homes [3]. Data from these forms were transcribed onto summary sheets (see figure 2) for entry into the computer. Approximately 668 grants have been awarded in six award cycles (the fourth of which had two phases). A special grant award cycle, the Passive Initiative (PI), was held in December 1978. These data were collected in a slightly different format from the numbered cycles and were converted so that all Grant file data share a common format.

The Grant file contains three types of data: (1) grant level, including the grantee's name and address, funds awarded to the grantee by HUD, and the location of the project; (2) project level, including the type of housing (whether multi-family, single-family, etc.), the type of construction (new or retrofit), the number of units, the number of solar systems to be installed and the square-footage of living area in each building; and (3) system level, including the following items:

- type of system (heating, cooling or domestic hot water),
- kind of system (active, passive or a combination of the two),
- transfer medium used in the solar collector (air or liquid),
- manufacturer of the solar collector,
- type of collector (evacuated tube, flat plate, concentrating or passive),
- aperture area of the solar collector, (square-feet),
- auxiliary fuel used as backup, (coal, electric, gas, oil, propane, or wood),
- each system's cost (total cost of the operational system and the amount being funded by the government),
- storage medium used (rock, liquid, brick, concrete, earth, or phase-change material),

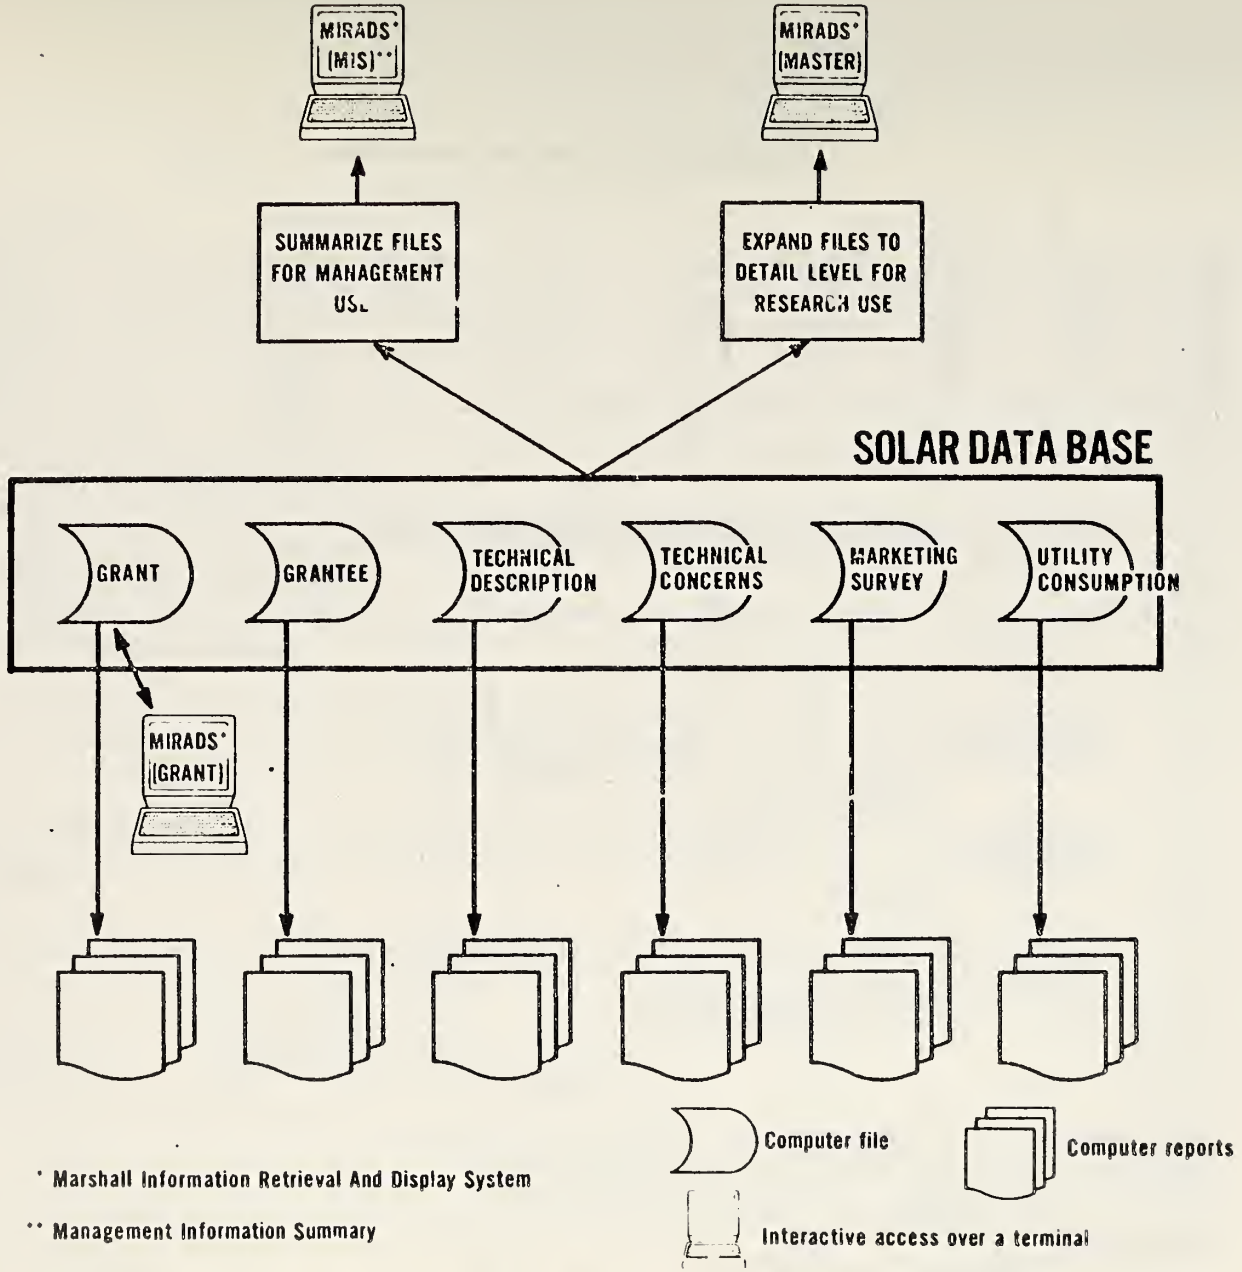

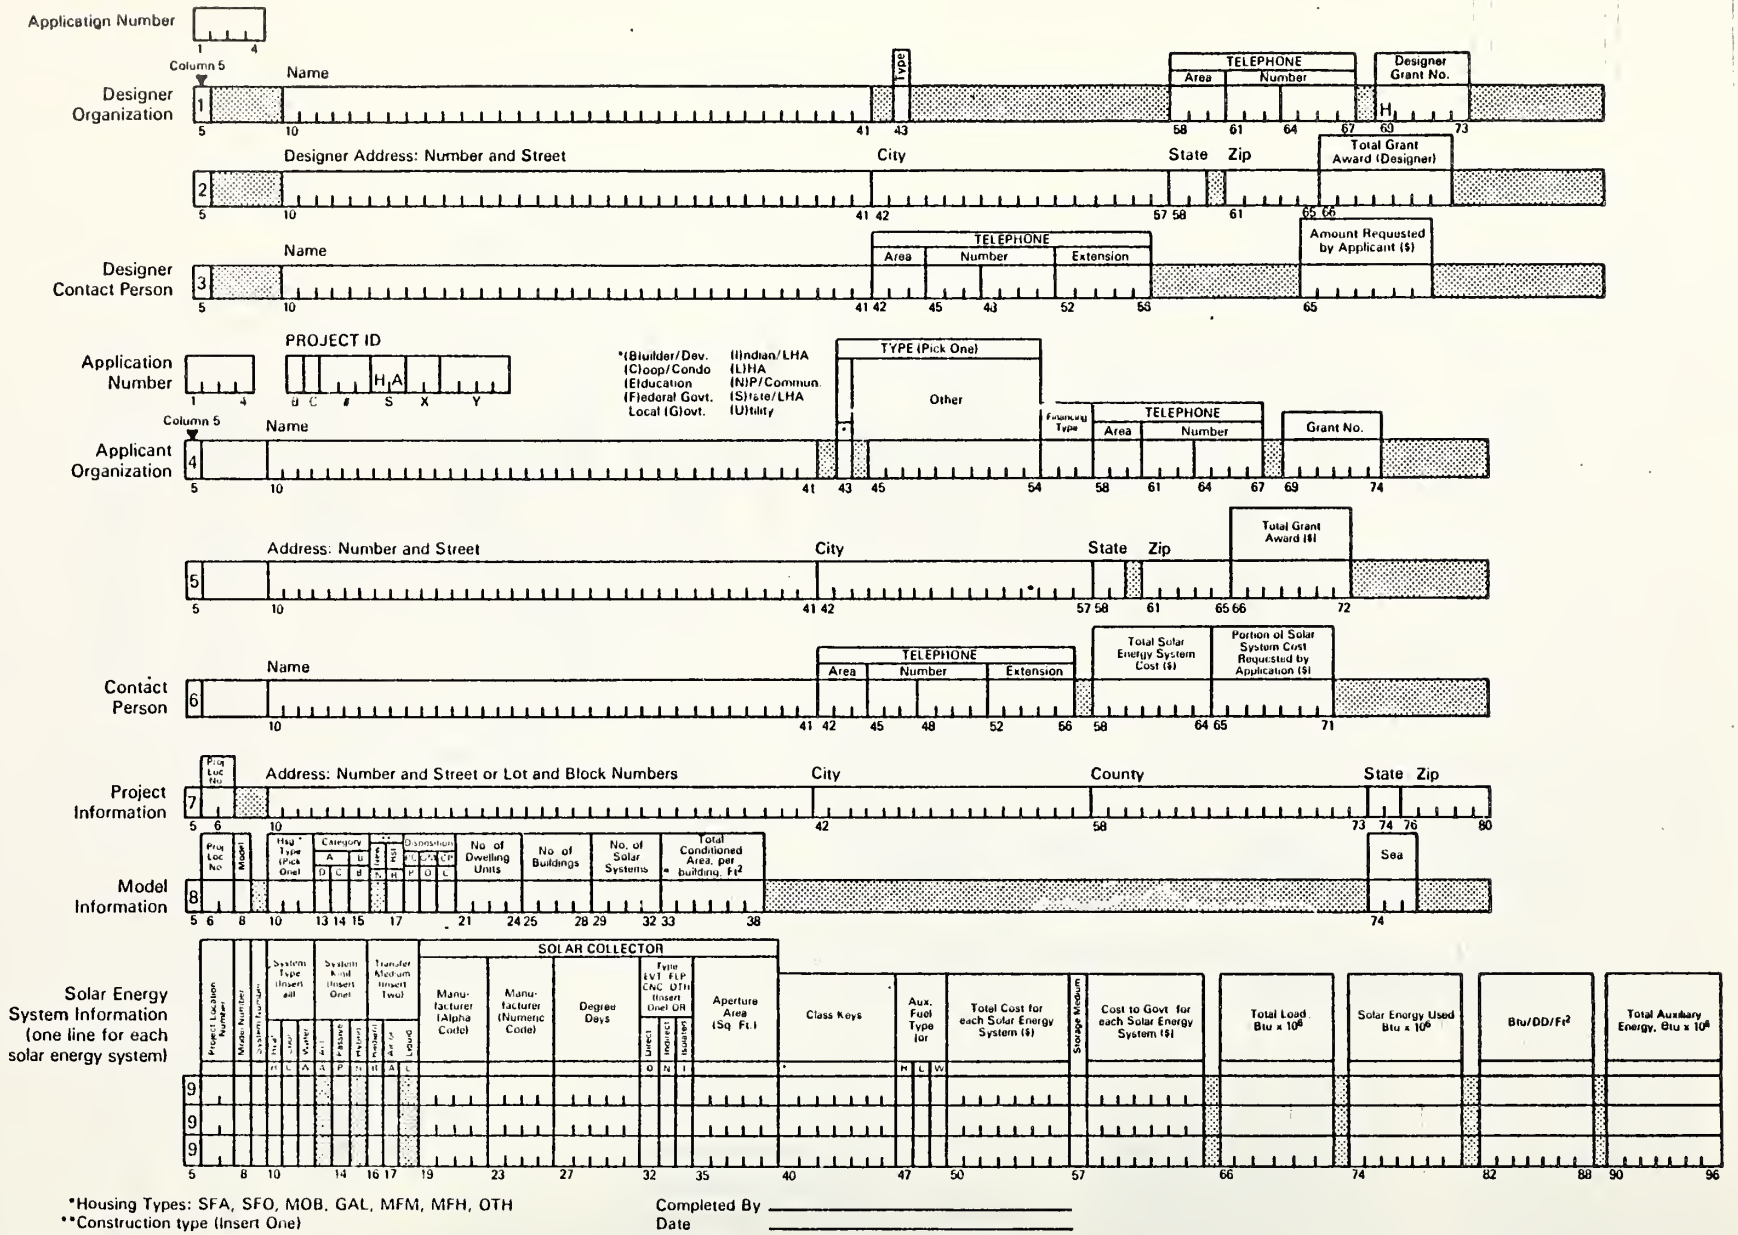

Figure 1: SOLAR DATA SYSTEM

*Housing Types: SFA, SFO, MOB, GAL, MFM, MFH, OTH
**Construction type (Insert One)

Completed By _____
Date _____

Figure 2: **BASIC SUMMARY FOR SOLAR GRANT APPLICATION**

- total load required and the amount each solar system will supply to produce heating, cooling and/or domestic hot water, (in million Btu's per year),

- Btu's per degree day per square foot of living area (Btu/DD/SQFT), a measure of the auxiliary heating requirements of the dwelling unit (collected for heat-only solar systems).

Grant file computer reports can be obtained from:

HUD User
P.O. Box 280
Germantown, MD 20767

Telephone: (301) 251-5154

3. Grant File Data Elements

The table in this section summarizes the data elements which appear in the computer reports contained in section 4. The following is an explanation of terms used in the column headings of this table:

Descriptive Name: The name given to the data element.

Terms of Measure: When appropriate, the units in which the data are recorded.

Codes: Codes and their interpretation for those data elements which are coded.

Definition of Data Element: A full definition of each data item.

Table 1. Grant File Data Elements

Descriptive Name	Terms of Measure	Codes	Definition of Data Element
Grant ID (DSG/BLD)	-	-	HUD numbering system for grant awarded. Cycle 1 Grant H2423-H2477 and Grant H2594-H2604 Cycle 2 Grant H2700-H2801 Cycle 3 Grant H8015-H8212 Cycle 4 Grant H8301-H8348 Cycle 4A Grant H8350-H8445 Cycle P1 Grant H8601-H8762 Cycle 5 Grant H8801-H8939
Builder/ Designer (B D)	-	B=Builder D=Designer	Indicates whether grantee was designer or builder of the solar project or both.
Grantee Name	-	-	The name of the organization, firm or person awarded the HUD grant.
Project Address	-	-	The city and state of the solar project.
Housing Type (HSG TYP)	-	SFA=single family attached SFD=single family detached MOB=mobile home GAL=garden apartment MFM=multi family midrise MFH=multi family highrise	The type of building or buildings at one location for a single model within a grant. A model groups together buildings with identical attributes (housing type, construction type and size.)
Construction Type (CNS TYP)	-	NEW=new RET=retrofit	Whether the system was included in a new building (NEW) or whether an existing building was retrofitted with a solar system (RET). Used for one location, one model in the grant.

Table 1. Grant File Data Elements (Continued)

Descriptive Name	Terms of Measure	Codes	Definition of Data Element
Number of Dwelling Units (DWL CNT)	-	-	Tells the number of dwelling units that are present in the buildings at one location, one model in the grant.
Number of Solar Systems (SOL SYS)	-	-	Total number of solar energy systems at one location and in one model.
Number of Buildings (NBR BLD)	-	-	This is the number of buildings at one location and in one model.
System Type (SYS TYP)	-	H=heating C=cooling W=hot water	Indicates the application(s) of the solar energy system for the given system number.
System Kind (A P)	-	A=active P=passive	Tells whether the system is active or passive.
Collector Area (CLTR SQFT)	Sq.Ft.	-	The gross area of the collector array used in the solar system.
Solar System Cost to Government (BLDR/DSGR COST TO GOVT)	$	-	The cost to HUD (amount funded) for the solar system broken down into designer and builder cost where applicable. (Costs in parenthesis not included in totals.)

Table 1. Grant File Data Elements (Continued)

Descriptive Name	Terms of Measure	Codes	Definition of Data Element
Solar Fraction (SOLAR FRAC(%)	%	-	The percentage of the total energy load provided by solar.
Auxiliary Fuel Type (AUX FUL)	-	E=electric G=gas O=oil P=propane W=wood R=other X=missing N=none	Backup fuel type--a three-column field. The first column indicates backup fuel for heating application, second for cooling, and third for hot water.
Storage Medium (STO MED)	-	BR=masonry CM=combination CO=concrete LQ=liquid PH=phase-change ST=rock OT=other	Material in which collected solar heat is stored for future use.
Solar System Cost per MBtu (COST/MBTU)	$	-	The total cost of one of the solar systems divided by the solar energy (in MBtu) supplied (per year) by the solar system. The MBtu value is predicted by the applicant.
Manufacturer of Solar System (SOL MFGR)	-	Codes are shown in Appendix A.	Name of the collector/solar system manufacturer of the given system.

4. Grant File Computer Reports

Grant file data stored on the computer can be retrieved in two ways: (1) by several formatted batch computer reports, which present the data elements in a variety of sorted orders; and (2) through an interactive query system, which gives the user at a remote terminal the flexibility of specifying the context and format of the report. This document addresses the formatted batch computer reports that are available. A separate publication, Residential Solar Data Center MIRADS User's Guide [4], contains user instructions for online access of the Grant file, a service which has been available to users authorized by HUD (primarily Demonstration Program contractors).

There are nine computer reports available using Grant data. Five of these reports and sample pages of another are contained in this document. The omitted reports were not included here in order to conserve space since with the exception of the detailed listing (SG-C1) they contain no additional information but merely present it in a different way. The following is a description of all nine of these computer reports and an indication of which are being included herein.

SG-C1:* Detailed Listing of Solar Grants (Sample Pages)

This report contains a listing of all elements of data which are entered into the data base for each grant awarded by HUD. These data elements consist of information about the grant, the location of the project, the building(s) which will be newly constructed or "retrofitted" with a solar energy system and the solar energy system(s) itself. This report contains approximately 500 pages of computer printout and is not included here, except for two sample pages in section 4.1, pages 13-15. The complete report is available from HUD at the address shown on page 5.

SG-C2: Units and Cost Analysis for All Grants (Included)

This printout is a one-page summary of the Grant file data broken down by type of building (single family detached, multi-family detached, etc.) and type of solar system configuration (hot water only, heating and cooling, etc.). These data are summarized by the number of dwelling units (separated into construction type--new, retrofit and total), by cost to HUD for the grant (new, retrofit, total) and by the average cost of a dwelling unit (new, retrofit, total). Summary counts are given for number of solar systems, number of buildings and number of active and passive systems. This report is shown in section 4.2, pages 16-17.

*Each computer report has a number associated with it. The number or the name of the report can be used when requesting copies.

SG-C3: Summary of Solar Grants, Sorted on Grant Number (Included)

This 25-page report presents selected data on all HUD grants. Fourteen of the most important data elements for each project are incorporated in this report, including: identification of the grantee; the location of the project; housing type (single family detached, multi-family detached, etc.); construction type (new or retrofit); counts of units, systems and buildings; basic system description, including collector manufacturer; and cost to HUD for the grant. Because grant numbers were assigned in sequence by HUD, the SG-C3 report lists grant Cycle 1 data before grant Cycle 2 data, etc. Trends in the kinds of projects which were emphasized in the funding process (e.g., by types of systems used - whether heating, cooling or hot water) are more apparent by scanning this report than any of the others. This report is shown in section 4.3, pages 18-43.

SG-C3F: Summary of Solar Grants, Sorted on Grant Number with Auxiliary Fuel Type and Storage Medium (Included)

This report, the newest sort, contains almost the same data elements as SG-C3 except that solar fraction has been replaced by auxiliary fuel type and storage medium. This 25-page report is shown in section 4.4, pages 44-69.

SG-C4BC: Summary of Solar Grants Sorted on Manufacturer, with Cost per MBtu (Included)

This report, which is sorted on solar collector manufacturer, contains the same data elements as the SG-C3 report described above, except that the manufacturer code has been translated and cost per MBtu used is shown instead of the designer and builder costs to government. This report is shown in section 4.5, pages 70-95.

SG-C4CG: Summary of Solar Grants Sorted on Manufacturer, with Cost to Govt (Not Included)

This report, which is sorted on solar collector manufacturer, contains the same data elements as the SG-C4BC report described above, except that the total cost to government is shown instead of the cost per MBTu used. This report is not included in this document.

SG-C5AS: Summary of Solar Grants Sorted on Grantee City and State (Not Included)

This report also contains essentially the same data elements as the SG-C3 report described above, except data are sorted by grantee city and state. Also the location of each grantee is printed instead of the corresponding location of the project. The states are usually the same, but the cities may differ. This report is not included in this document.

SG-C5PS: Summary of Solar Grants Sorted on Project City and State (Included)

This report, which is sorted by project city and state contains the same data elements as the SG-C3 report described above. This report is shown in section 4.6, pages 96-124.

SG-C7: Summary of Solar Grants Sorted and Totaled by Project HUD Region (Not Included)

This report, which is sorted by HUD geographical region, contains the same data elements as the SG-C3 report described above with the addition of the appropriate region code for each grant. This report is not included in this document.

As previously noted, copies of the Grant file computer reports not included here may be obtained from HUD at the address shown on page 5.

5. Grant File Data Bar Graphs

In the following bar graphs, certain data elements contained in the Grant file have been summarized and used to give a visual profile of the grants awarded by HUD to date in the Solar Demonstration Program. All of these data elements are also contained in the computer reports shown in Section 4.1 through 4.6.

The bar graphs included here are:

Number of Grants vs Cycles

Number of Systems vs Cycles

Number of Dwelling Units vs Cycles

Number of Systems vs Collector Area Distribution (Sq. Ft.)

Number of Systems vs Cycles and System Kind (Active, Passive)

Number of Systems vs Cycles and System Application (H, HC, HW, HCW, W)

Number of Systems vs Cycles and Transfer Medium (Air, Liquid, Radiant, Radiant/Air)

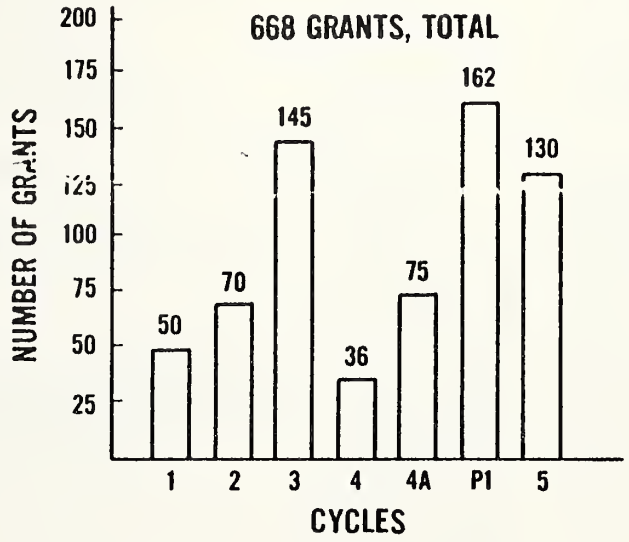

Number of Dwelling Units vs Cycles and Construction Types (New, Retrofit)

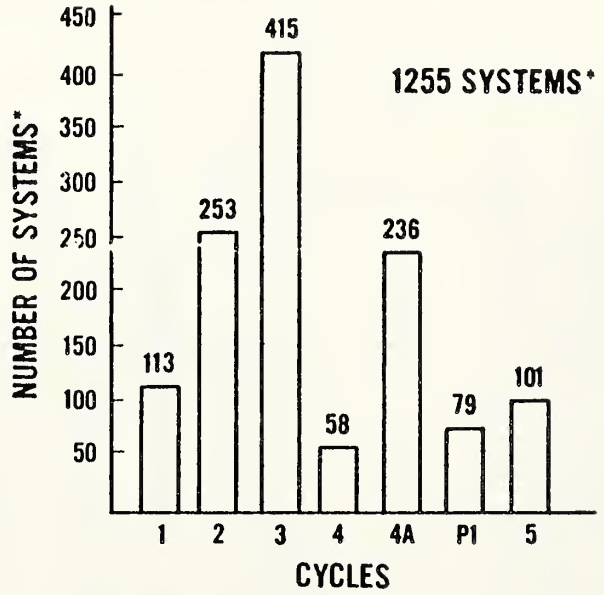

Number of Dwelling Units vs Cycles and Housing Types (Single-family, Multiple-family)

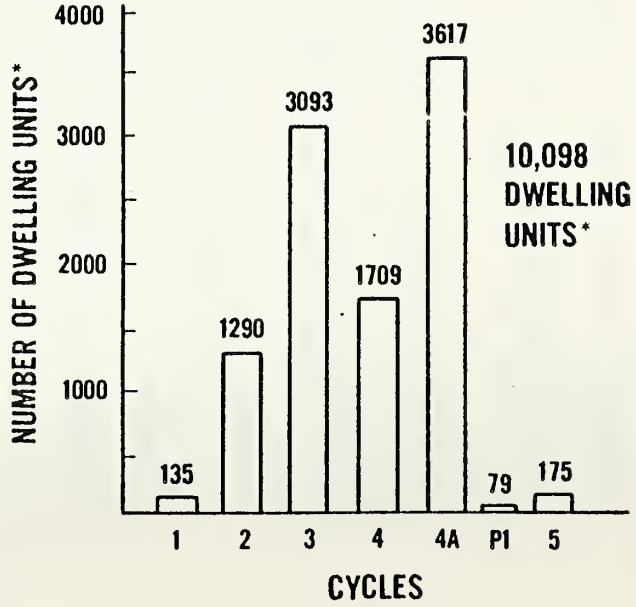

Number of Dwelling Units vs Location (by States - AK to MT)

Number of Dwelling Units vs Location (by States - NC to WY)

6. Summary

The Grant file data presented in this report represent all data collected through the six award cycles by the Department of Housing and Urban Development. Included were some of the computer reports and bar graphs which were produced from this file of data. Any of the computer reports described here are available from HUD at the address shown on page 5.

7. Acknowledgments

The authors wish to thank Mark McGrath of Boeing Aerospace Company for his invaluable assistance in assuring the accuracy of the Grant file data from which the computer reports and bar graphs were prepared.

The authors would also like to acknowledge the assistance of Martin J. Arnoff (formerly of the Institute for Computer Sciences and Technology, National Bureau of Standards), in co-authoring the earlier, 1979 version of this publication.

Dr. Blanton C. Duncan, Project Leader, and Ms. Mary Lou Hudtloff, Analyst/Programmer of Old Dominion Systems, Inc., developed the computer programs which were used to produce the Grant file reports.

10. SUPPLEMENTARY NOTES

[ ] Document describes a computer program; SF-185, FIPS Software Summary, is attached.

11. ABSTRACT (A 200-word or less factual summary of most significant information. If document includes a significant bibliography or literature survey, mention it here)

The Residential Solar Data Center project staff in the Center for Building Technology, National Bureau of Standards, has been responsible for the establishment and operation of a computerized data base containing non-instrumented residential data generated by the Solar Heating and Cooling Demonstration Program sponsored by the Department of Energy (DoE) and the Department of Housing and Urban Development (HUD). This document includes computer reports of data contained in the Grant file, one of six computer files comprising the data base. These reports contain data recorded on applications submitted to HUD by organizations or individual builders applying for grants to build solar energy systems in new and/or existing homes. Approximately 668 grants have been awarded in six award cycles.

12. KEY WORDS (Six to twelve entries; alphabetical order; capitalize only proper names; and separate key words by semicolons)

Automatic data processing; computer reports; grant data; residential buildings; solar data base; solar energy system; solar hot water, space heating and cooling.
