Reports on Information Technology

The National Institute of Standards and Technology (NIST)'s Information Technology Laboratory (ITL) develops standards and guidelines, provides technical assistance, and conducts research for computers and resources. As part of the overall federal effort to establish a single face to industry for conducting electronic commerce, ITL has been designated as the organization responsible for coordinating the development of Federal Implementation Conventions (ICs) for Electronic Data Interchange (EDI). ICs are defined by functional-area experts who create and select options from standard EDI Transaction Sets to yield the implementations to be used for practical EDI. These ICs are made available to federal agencies and industry by electronic means and this Special Publication Series.

805 Contract Pricing Proposal

Functional Group ID=CP

Introduction:

This Draft Standard for Trial Use contains the format and establishes the data contents of the Contract Pricing Proposal Transaction Set (805) cover sheet and pricing support detail for use within the context of an Electronic Data Interchange (EDI) environment. This transaction set enables the transmission of cost and pricing data for a given contract action and provides pricing support detail data or references where that data can be found in the proposal.

Notes:

1. This transaction set is used by a contractor to provide "cost or pricing data" or "information other than cost or pricing data" (hereafter referred to by the term data) requested by a contracting officer in accordance with the provisions of the Federal Acquisition Regulation 15.8

2. This transaction set can be used to provide data for a solicitation or for a single award instrument, e.g., a contract, a delivery order, etc.; for a modification to an award instrument; or for several modifications to an award instrument when the data does not need to be identified to a specific modification.

3. Supporting data that is not contained in this transaction set shall be provided in the 251 transaction set.

4. All numbers cited in this transaction set shall be transmitted as a continuous number without extraneous characters except where such characters are a part of the number.

Transaction Set Notes

- 1. When the N1 loop is used, it will carry the name and address of a party pertinent to the proposal, such as the proposing party, the place(s) of performance, the contract adminstration, and auditing offices.
- 2. When CB101 is code ``01," ``05," ``08," ``10," ``11," ``12," ``14" or ``17," discussion will be carried in the MSG segment in the CB1 loop; numbers and their text descriptions will be carried in the N9 segment of the CB1 loop.
- 3. When the N1 loop is used, it will carry the name and address of a party needed to clarify a response to a question answered in the CB1 loop, such as party for whom the same or a similar item as the one being proposed, has been previously produced.

805 - Contract Pricing Proposal

- 4. PD03 is the unit of measurement for the data contained in the PD loop.
- 5. When the N1 loop is used, it will carry the name and address of a party related to the proposal data such as a major subcontractor whose cost or price information has been rolled up into this price proposal.
- 6. When the AMT segment is used, it can carry amounts such as the proposed cost, total proposed fee, total proposed profit, total cost of money, total proposed price or alternate proposed price.

Segment:	N1 Name							
Position:	060							
Loop:	NI							
Level:	Heading							
Usage:	Optional							
Max Use:	1							
Purpose:	To identify a party by type of organization, name, and code							
Syntax Notes:	1 At least one of N102 or N103 is required.							
	2 If either N103 or N104 is present, then the other is required.							
Semantic Notes:								
Comments:	 This segment, used alone, provides the most efficient method of providing organizational identification. To obtain this efficiency the "ID Code" (N104) must provide a key to the table maintained by the transaction processing party. N105 and N106 further define the type of entity in N101. 							
Notes:	 Whenever possible, identification and address information should be provided using N101, N103, and N104. Use N102 and segments N2 through N4, as applicable, when the address cannot be provided using one of the codes listed in N103. 							
	2. When BCP01 is code 00, 07, or 15, and the cost or price proposal is submitted by a prime contractor, multiple iterations of this N1 loop are REQUIRED with N101 citing, at a minimum, codes SE, C4, and KF. Codes 28 and 61 must also be used if applicable.							

3. When BCP01 is code 00, 07, or 15, and the cost or price proposal is submitted by a subcontractor, there must be multiple iterations of the N1 loop with N101 citing, at a minimum, codes 28, C4, KF and SE. Code 61 must also be used if applicable.

4. When BCP01 is code 01, there must be 2 iterations of the N1 loop citing either code SE or 28 in N101 in one iteration and either code BY or C4 in a second iteration.

 Product/Service ID Qualifier
 M

 Code identifying the type/source of the descriptive number used in
 Descriptive number used in

M ID 2/2

Product/Service ID (234) 1. LIN02 through LIN31 are used in pairs, e.g., LIN02 contains a qualifier code and LIN03 contains data related to the code.

2. Any code can be used, but the same codes used in the corresponding 843 transaction set should be used. The listed codes are preferred.

3. When identifying components of an assembly, the assembly must be identified by use of code F8.

4. Any code identified in this data element may be used in any following 235 data element.

AK Refined Product Code CG Commodity Grouping Use to indicate a commodity code.

- CH Country of Origin Code
- CL Color
- CN Commodity Name
- EF Exhibit Identifier

Use to indicate the letter assigned to an exhibit.

F7 End-Item Description

Use to indicate the end item to which the ordered item applies.

F8 Next Higher Used Assembly Use to indicate the assembly to which the identified components apply.

FS National Stock Number The NSN shall be transmitted without dashes.

FT Federal Supply Classification

IN Buyer's Item Number

Use to indicate a locally assigned code for a product or service whenever stock number does not apply.

KF Item Type Number

LT Lot Number

MF Manufacturer

When used, cite the DUNS number of the manufacturer in the following data element.

MG Manufacturer's Part Number

When used, a second 235/234 pair must be used citing either code MF or ZB.

MN Model Number

N1 National Drug Code in 4-4-2 Format

N2 National Drug Code in 5-3-2 Format

- N3 National Drug Code in 5-4-1 Format
- N4 National Drug Code in 5-4-2- Format
- ND National Drug Code (NDC)

PD Part Number Description

Use to indicate a clear text description of an item that cannot be identified by a number, e.g., transportation.

PN Company Part Number

PU Part Reference Number

Use to indicate a part number assigned by an industry (not related to a specific manufacturer). Do not use for National Drug Codes.

RC Returnable Container No.

Use to indicate an NSN, manufacturer's part number, or other identifying number (except a serial number) of a returnable container.

SN Serial Number

Use to indicate the serial number of the item cited in JIL02. For example, the serial number of an aircraft engine that is to be repaired.

SV Service Rendered Use to indicate (in text) the service being ordered.

SW Stock Number

manufacturer.

Use to indicate a local stock number.

SZ Vendor Alphanumeric Size Code (NRMA) Use to indicate the size of an item being ordered.

UK U.P.C./EAN Shipping Container Code (1-2-5-5-1)

VP Vendor's (Seller's) Part Number Use to indicate a part number assigned by a contractor other than a

statement.

Segment:	N1 Name					
Position:	190					
Loop:	N1					
Level:	Heading					
Usage:	Optional					
Max Use:	1					
Purpose:	To identify a party by type of organization, name, and code					
Syntax Notes:	1 At least one of N102 or N103 is required.					
	2 If either N103 or N104 is present, then the other is required.					
Semantic Notes:						
Comments:	1 This segment, used alone, provides the most efficient method of providing					
	organizational identification. To obtain this efficiency the "ID Code" (N104) must					
	provide a key to the table maintained by the transaction processing party.					
	2 N105 and N106 further define the type of entity in N101.					
Notes:	1. When CB101 is code 01, 05, 11, or 12, use to identify the party holding the required					
	government furnished property if other than the proposing party, the customer for whom					
	the same or similar work was performed or the party that received a disclosure					

2. Whenever possible, identification and address information should be provided using N101, N103, and N104. Use N102 and segments N2 through N4, as applicable, when the address cannot be provided using one of the codes listed in N103.

Segment:	PL Proposal Cost Logic
Position:	010
Loop:	
Level:	Detail
Usage:	Optional
Max Use:	>1
Purpose:	To describe the cost logic used when pricing a particular aspect of a proposal
Syntax Notes:	
Semantic Notes:	1 PL01 is the logic sequence number.
	2 PL03 is the name of the cost element being proposed.
	3 PL05 is a text description of the cost element contained in PL03.
	A DY OC is an anomaly start what is directed the set of

4 PL06 is an occurrence counter that indicates the order of items to appear in a cost summary data display.

Comments: Notes:

1. This segment is REQUIRED in original, duplicate or revised transaction sets, e.g., when BCP01 is code 00, 07 or 15.

2. The PL Segment should be used in a "bottom-up" approach, (e.g., if total direct labor dollars is composed of engineering labor dollars plus manufacturing labor dollars, then the calculation formula for these must be presented in the transaction set before the calculation for the direct labor dollars).

EXAMPLE:

PL*1*DO*DEL*E*DIRECT ENGINEERING LABOR*2 N/L PL*2*HR*DELH*M*DIRECT ENGINEERING LABOR HOURS N/L PL*3*A8*ELR*F*ENGINEERING LABOR RATE N/L PL*4*DO*DML*E*DIRECT MANUFACTURING LABOR*3 N/L PL*5*HR*DMLH*M*DIRECT MANUFACTURING LABOR HOURS N/L PL*6*A8*MLR*F*MANUFACTURING LABOR RATE N/L PL*7*DO*TDL*E*TOTAL DIRECT LABOR*1 N/L PL*8*DO*TDEL*A N/L PL*9*DO*TDML*F N/L

3. If the proposed labor rates are at a lower level, e.g., by engineering labor category or by department, then the PL Segments must start at that lower level to conform to the "bottom-up" convention.

4. If the formula provided in this segment is for a total, the PD/PDD segments shall be used to provide the total.

5. Use of the number "1" in PL06 of the first iteration of the PL Segment in the example above, indicates its order on the summary table; i.e., it would be displayed first.

Segment:	N1 Name
Position:	080
Loop:	N1
Level:	Detail
Usage:	Optional
Max Use:	1
Purpose:	To identify a party by type of organization, name, and code
Syntax Notes:	1 At least one of N102 or N103 is required.
	2 If either N103 or N104 is present, then the other is required.
Semantic Notes:	
Comments:	 This segment, used alone, provides the most efficient method of providing organizational identification. To obtain this efficiency the "ID Code" (N104) must provide a key to the table maintained by the transaction processing party. N105 and N106 further define the type of entity in N101.
Notes:	1. Whenever possible, identification and address information should be provided using

1. Whenever possible, identification and address information should be provided using N101, N103, and N104. Use N102 and segments N2 through N4, as applicable, when the address cannot be provided using one of the codes listed in N103.

2. Use this N1 loop only to provide address and reference number data when the proposal contains discreet values, (e.g., subcontract costs, inter-divisional transfers, etc.).

3. When either code 28 or DV is used, another iteration of this loop is REQUIRED citing code C4 in N101.

N104

Code identifying a party or other code

Segment:	N2 Additional Name Information
Position:	090
Loop:	N1
Level:	Detail
Usage:	Optional
Max Use:	2
Purpose:	To specify additional names or those longer than 35 characters in length
Syntax Notes:	
Semantic Notes:	
Comments:	
Notes:	This segment should only be used when N102 is used and it is necessary to provide additional name information.

			Data Element Summary			
	Ref.	Data				
	Des.	Element	Name	Att	ribute	<u>s</u>
Must Use	N201	93	Name	Μ	AN	1/35

Segment:	N4 Geographic Location
Position:	110
Loop:	N1
Level:	Detail
Usage:	Optional
Max Use:	1
Purpose:	To specify the geographic place of the named party
Syntax Notes:	1 If N406 is present, then N405 is required.
Semantic Notes:	
Comments:	1 A combination of either N401 through N404, or N405 and N406 may be adequate to specify a location.
	2 N402 is required only if city name (N401) is in the USA or Canada.
Notes:	This segment should only be used when N102 is used.

Ref.	Data				
Des.	Element	Name	Att	ribute	5
N401	19	City Name	0	AN	2/30
		Free-form text for city name			
N402	156	State or Province Code	0	D	2/2
		Code (Standard State/Province) as defined by appropriate	govern	ment a	igency

		Code identifying the country			

Segment:	LX Assigned Number		
Position:	010		
Loop:	LX		
Level:	Summary		
Usage:	Optional		
Max Use:	1		
Purpose:	To reference a line number in a transaction set		
Syntax Notes:			
Semantic Notes:			
Comments:			
Notes:	Use of this loop is REQUIRED when BCP01 is code	00, 07,	or 15.

	Ref.	Data				
	<u>Des.</u>	Element	Name	Att	ributes	5
Must Use	LX01	554	Assigned Number	Μ	NO	1/6
			Number assigned for differentiation within a transaction set			
			A unique sequence number, starting with the number 1, e.g.,	1, 2,	3, etc.	

Segment:	G61 Contact
Position:	020
Loop:	LX
Level:	Summary
Usage:	Optional
Max Use:	1
Purpose:	To identify a person or office to whom communications should be directed
Syntax Notes:	1 If either G6103 or G6104 is present, then the other is required.
Semantic Notes:	
Comments:	1 G6103 qualifies G6104.
Notes:	This segment is REQUIRED when BCP01 is code 00, 07, or 15.

	Ref.	Data					
	Des.	Element	Name		Att	ribute	<u>s</u>

			2. Either code TD o	r TE may be used, but not both.			
			amount carried in A	barty is submitting an alternate low MT02 when AMT01 is code TF, a s with AMT01 citing code TG. Cost of Money Proposed Cost Proposed Profit Proposed Fee Total Proposed Price Alternate Proposed Price			
Must Use	AMT02	782	Monetary Amount Monetary amount		Μ	R	1/15
				nt represented by the qualifier code			

2. When AMT01 is code TF, the amount will equal the sum of the amounts representative of the AMT01 qualifier codes TC, TD or TE, and MC.

805 - Contract Pricing Proposal

Segment:	SE Transaction Set Trailer
Position:	040
Loop:	
Level:	Summary
Usage:	Mandatory
Max Use:	1
Purpose:	To indicate the end of the transaction set and provide the count of the transmitted segments (including the beginning (ST) and ending (SE) segments).
Syntax Notes:	
Semantic Notes:	
Comments:	1 SE is the last segment of each transaction set.

	Ref.	Data				
	Des.	Element	Name	Attributes		
Must Use	SE01	96	Number of Included Segments	Μ	NO	1/10
			Total number of segments included in a transaction set include segments	ling	ST an	d SE
Must Use	SE02	329	Transaction Set Control NumberMAN4/Identifying control number that must be unique within the transaction setfunctional group assigned by the originator for a transaction setThe same unique control number cited in ST02.			

NIST Technical Publications

Periodical

Journal of Research of the National Institute of Standards and Technology—Reports NIST research and development in those disciplines of the physical and engineering sciences in which the Institute is active. These include physics, chemistry, engineering, mathematics, and computer sciences. Papers cover a broad range of subjects, with major emphasis on measurement methodology and the basic technology underlying standardization. Also included from time to time are survey articles on topics closely related to the Institute's technical and scientific programs. Issued six times a year.

Nonperiodicals

Monographs—Major contributions to the technical literature on various subjects related to the Institute's scientific and technical activities.

Handbooks—Recommended codes of engineering and industrial practice (including safety codes) developed in cooperation with interested industries, professional organizations, and regulatory bodies.

Special Publications—Include proceedings of conferences sponsored by NIST, NIST annual reports, and other special publications appropriate to this grouping such as wall charts, pocket cards, and bibliographies.

National Standard Reference Data Series—Provides quantitative data on the physical and chemical properties of materials, compiled from the world's literature and critically evaluated. Developed under a worldwide program coordinated by NIST under the authority of the National Standard Data Act (Public Law 90-396). NOTE: The Journal of Physical and Chemical Reference Data (JPCRD) is published bimonthly for NIST by the American Chemical Society (ACS) and the American Institute of Physics (AIP). Subscriptions, reprints, and supplements are available from ACS, 1155 Sixteenth St., NW, Washington, DC 20056.

Building Science Series—Disseminates technical information developed at the Institute on building materials, components, systems, and whole structures. The series presents research results, test methods, and performance criteria related to the structural and environmental functions and the durability and safety characteristics of building elements and systems.

Technical Notes—Studies or reports which are complete in themselves but restrictive in their treatment of a subject. Analogous to monographs but not so comprehensive in scope or definitive in treatment of the subject area. Often serve as a vehicle for final reports of work performed at NIST under the sponsorship of other government agencies.

Voluntary Product Standards—Developed under procedures published by the Department of Commerce in Part 10, Title 15, of the Code of Federal Regulations. The standards establish nationally recognized requirements for products, and provide all concerned interests with a basis for common understanding of the characteristics of the products. NIST administers this program in support of the efforts of private-sector standardizing organizations.

Order the following NIST publications—FIPS and NISTIRs—from the National Technical Information Service, Springfield, VA 22161.

Federal Information Processing Standards Publications (FIPS PUB)—Publications in this series collectively constitute the Federal Information Processing Standards Register. The Register serves as the official source of information in the Federal Government regarding standards issued by NIST pursuant to the Federal Property and Administrative Services Act of 1949 as amended, Public Law 89-306 (79 Stat. 1127), and as implemented by Executive Order 11717 (38 FR 12315, dated May 11, 1973) and Part 6 of Title 15 CFR (Code of Federal Regulations).

NIST Interagency Reports (NISTIR)—A special series of interim or final reports on work performed by NIST for outside sponsors (both government and nongovernment). In general, initial distribution is handled by the sponsor; public distribution is by the National Technical Information Service, Springfield, VA 22161, in paper copy or microfiche form.
