U.S. DEPARTMENT OF COMMERCE/National Bureau of Standards

1984 NVLAP

Directory of Accredited Laboratories

QC 100 .U57 No. 687 1985 he National Bureau of Standards<sup>1</sup> was established by an act of Congress on March 3, 1901. The Bureau's overall goal is to strengthen and advance the nation's science and technology and facilitate their effective application for public benefit. To this end, the Bureau conducts research and provides: (1) a basis for the nation's physical measurement system, (2) scientific and technological services for industry and government, (3) a technical basis for equity in trade, and (4) technical services to promote public safety. The Bureau's technical work is performed by the National Measurement Laboratory, the National Engineering Laboratory, the Institute for Computer Sciences and Technology, and the Center for Materials Science.

### The National Measurement Laboratory

Provides the national system of physical and chemical measurement; coordinates the system with measurement systems of other nations and furnishes essential services leading to accurate and uniform physical and chemical measurement throughout the Nation's scientific community, industry, and commerce; provides advisory and research services to other Government agencies; conducts physical and chemical research; develops, produces, and distributes Standard Reference Materials; and provides calibration services. The Laboratory consists of the following centers:

- Basic Standards<sup>2</sup>
- Radiation Research
- Chemical Physics
- Analytical Chemistry

### The National Engineering Laboratory

Provides technology and technical services to the public and private sectors to address national needs and to solve national problems; conducts research in engineering and applied science in support of these efforts; builds and maintains competence in the necessary disciplines required to carry out this research and technical service; develops engineering data and measurement capabilities; provides engineering measurement traceability services; develops test methods and proposes engineering standards and code changes; develops and proposes new engineering practices; and develops and improves mechanisms to transfer results of its research to the ultimate user. The Laboratory consists of the following centers:

- Applied Mathematics
- Electronics and Electrical Engineering<sup>2</sup>
- Manufacturing Engineering
- Building Technology
- Fire Research
- Chemical Engineering<sup>2</sup>

### The Institute for Computer Sciences and Technology

Conducts research and provides scientific and technical services to aid Federal agencies in the selection, acquisition, application, and use of computer technology to improve effectiveness and economy in Government operations in accordance with Public Law 89-306 (40 U.S.C. 759), relevant Executive Orders, and other directives; carries out this mission by managing the Federal Information Processing Standards Program, developing Federal ADP standards guidelines, and managing Federal participation in ADP voluntary standardization activities; provides scientific and technological advisory services and assistance to Federal agencies; and provides the technical foundation for computer-related policies of the Federal Government. The Institute consists of the following centers:

- Programming Science and Technology
- Computer Systems
  Engineering

### The Center for Materials Science

Conducts research and provides measurements, data, standards, reference materials, quantitative understanding and other technical information fundamental to the processing, structure, properties and performance of materials; addresses the scientific basis for new advanced materials technologies; plans research around cross-country scientific themes such as nondestructive evaluation and phase diagram development; oversees Bureau-wide technical programs in nuclear reactor radiation research and nondestructive evaluation; and broadly disseminates generic technical information resulting from its programs. The Center consists of the following Divisions:

- Inorganic Materials
- Fracture and Deformation<sup>3</sup>
- Polymers
- Metallurgy
- Reactor Radiation

<sup>&</sup>lt;sup>1</sup>Headquarters and Laboratories at Gaithersburg, MD, unless otherwise noted; mailing address Gaithersburg, MD 20899.

<sup>&</sup>lt;sup>2</sup>Some divisions within the center are located at Boulder, CO 80303.

<sup>&</sup>lt;sup>3</sup>Located at Boulder, CO, with some elements at Gaithersburg, MD.

### **PREFACE**

The National Bureau of Standards' National Voluntary Laboratory Accreditation Program (NVLAP) improves the competence of testing laboratories and the reliability of laboratory measurements through transfer of measurement technology. Critical elements of test methods are identified along with precision and accuracies expected from the methods when measurements are made. Proficiency testing and interlaboratory comparisons contribute to improved test methods and laboratory performance.

This directory provides information on the activities of the National Bureau of Standards in administering NVLAP during calendar year 1984. Voluntary participation by the Nation's laboratories is increasing and several new accreditation efforts requested by government agencies and private organizations have been established.

The accredited laboratories have been found competent to perform the specific test methods shown in the Directory of Accredited Laboratories. They have the skilled people, necessary facilities and equipment, and documentation and quality assurance systems to produce reliable test data. We recommend that consideration be given to the use of these laboratories whenever their accredited testing capabilities satisfy testing needs.

NVLAP has also provided the basis for acceptance by other countries of test data produced by laboratories in the United States through bilateral agreements. We shall continue to work toward liberalizing the means to satisfying trade requirements whenever possible.

Director

Office of Product Standards Policy

nly Markan

### REPORT OF PROGRAM ACTIVITIES

#### Introduction

The National Voluntary Laboratory Accreditation Program (NVLAP), administered by the National Bureau of Standards (NBS), was established in 1976 to accredit laboratories for specific tests or types of tests in certain product or service areas where a need for accreditation is determined. As of December 31, 1984, NVLAP has accredited 130 laboratories by laboratory accreditation program (LAP).

Accreditation criteria, which are published as part of the NVLAP procedures, are used for evaluating applicant laboratories. NBS uses periodic on-site assessments, proficiency testing programs, and questionnaires as evaluation tools.

This Directory is the eighth in a series of documents which describe NVLAP program activities and present the list of accredited laboratories and the test methods for which they are accredited.

The beginning of Fiscal Year 1985, on October 1, marked the successful completion of the first phase of NVLAP operations. Since its inception, NVLAP has been provided Federal resources for the development of new LAPs. In keeping with program objectives NVLAP began fully cost reimbursable operations on October 1. Requestors of new LAPs are asked to provide resources for the development of the technical content of new LAPs. In most cases contributing technical assistance, in the development of requirements and criteria, through personal participation rather than funding is needed to initiate a new LAP.

The following sections describe the status of current LAPs, the growth in laboratory participation, and the processes for becoming accredited and requesting new LAPs.

#### Revision of Procedures

The NVLAP Procedures underwent the first major revision since the procedures were established in February 1976. NBS published the new NVLAP procedures in the *Federal Register* on November 8, 1984. The goals of NVLAP remain unchanged, but the requirements for requesting, developing, and establishing laboratory accreditation programs (LAPs) have been significantly changed. Use of the *Federal Register* has also been minimized.

The goals of NVLAP are to:

- (1) Provide national recognition for competent laboratories;
- Provide laboratory management with a quality assurance check;
- (3) Identify competent laboratories for laboratory users; and
- (4) Provide laboratories with guidance from technical experts to improve their performance.

Previous requirements for monthly, quarterly and annual reports, many of which needed to be published in the *Federal Register*, have been eliminated. Now, a directory of accredited laboratories will be published annually, with periodic supplements to the directory published as necessary.

LAPs will continue to be developed in response to requests and demonstrated need. However, preliminary and final findings of need will no longer be published in the *Federal Register*. A requestor must still identify the product or service of a proposed LAP and the standards and test methods proposed for inclusion as well as state why the public would benefit, why there is a national need for such a LAP, and what the expected market would be. Interested parties still have the opportunity to comment on the need for any proposed LAP.

In addition to the actions of granting, renewing, denying, and revoking accreditation, NBS will now have the flexibility of suspending a laboratory's accreditation.

Conditions and criteria for accreditation have been clarified and enhanced. The criteria essentially follow the requirements of ISO Guide 25: General Requirements for the Technical Competence of Testing Laboratories. The elements of the criteria address a laboratory's:

- (1) quality system;
- (2) staff;
- (3) facilities and equipment;
- (4) calibration;
- (5) test methods and procedures;
- (6) records; and
- (7) test reports.

Overall, the revision is a significant improvement that enables NBS to administer NVLAP more efficiently than was possible under the previous procedures.

#### **Established Laboratory Accreditation Programs**

Laboratories continue to apply for initial accreditation and reaccreditation in the Thermal Insulation, Concrete, Carpet, Stove, and Acoustics LAPs. In addition, new LAPs have been established for: laboratories that test paint, paper, or mattresses (the Commercial Products LAP), processors of personnel dosimeters (the Dosimetry LAP), and laboratories that test photographic film (the Film LAP). Laboratories have requested and been accredited under the Commercial and Dosimetry LAPs.

The current participation and accreditable test methods for all established LAPs are given in following sections of this Directory.

#### **Insulation LAP**

The LAP for thermal insulation materials testing has 62 test methods for which a laboratory can seek accreditation. As of December 31, 1984, 36 laboratories were accredited to perform those test methods. Twenty-seven on-site visits were made during the year to accredited laboratories or those seeking accreditation. NBSIR 84-2890 reporting the results of Proficiency Test Round 9 was issued in May 1984. The results of Round 10 will be issued in 1985.

#### Concrete LAP

The LAP for freshly mixed concrete testing has seven test methods covering field testing and laboratory testing. As of December 31, 1984, 31 laboratories were accredited to perform selected test methods. Thirteen on-site visits were made during the year to accredited laboratories or those seeking accreditation. Results of the Concrete LAP between-laboratory proficiency testing program were reported to participants in August 1984.

#### Carpet LAP

The LAP for carpet testing has 12 test methods for which a laboratory can seek accreditation. As of December 31, 1984, 24 laboratories were accredited to perform selected test methods. The Department of Housing and Urban Development uses test results produced by these laboratories as part of its carpet certification program. Seventeen on-site visits were made during the year to accredited laboratories or those seeking accreditation. The sixth and seventh rounds of proficiency testing were completed for carpet test methods involving colorfastness, pile weight, pile thickness, strength, and flammability properties. A Tech Brief reporting the results of Round 7 and summarizing the results of Rounds 1 through 7, was issued in February 1984. Round 8 will be issued early in 1985.

#### Stove LAP

The LAP for solid fuel room heaters has 36 test methods, arranged in three groups: (1) a physical/fire test group, (2) a mobile home test group, and (3) an electrical test group, for which a laboratory can seek accreditation. Canadian Standards Association (CSA) Standards B 366.2-M1984, C 22.2 No. 103-1979, and C 22.2 No. 113-1982, have been added to the available test methods. A laboratory may be accredited in any

one of 12 options which are various combinations of the three groups and Underwriters Laboratory and CSA standards. As of December 31, 1984, 10 laboratories were accredited to perform selected test methods. Four on-site visits were made during the year to accredited laboratories or those seeking accreditation. A Tech Brief reporting the results of Round 2 Proficiency Testing was issued in November 1984.

#### **Acoustics LAP**

The LAP for acoustical testing services has 49 test methods for which a laboratory can seek accreditation. As of December 31, 1984, eight laboratories were accredited to perform selected test methods. Three on-site visits were made during the year to laboratories seeking accreditation. Data have been collected from participating laboratories for Round 1 of proficiency testing for ASTM test method E 90. A Tech Brief reporting the results of the first round of proficiency testing for C 423-81 was issued in September 1984.

#### **Dosimetry LAP**

The LAP for Personnel Radiation Dosimetry Processors began officially on January 1, 1984. Processors may be accredited in any or all of eight categories. During the year 29 processors participated in proficiency testing in accordance with ANSI N13.11-1983. Successful completion of proficiency testing in each category requested is mandatory to gain accreditation. Twenty-three on-site visits were made to processors seeking initial accreditation in this LAP. As of December 31, 1984, 19 processors have been accredited.

#### Commercial Products LAP

The LAP for commercial products has a total of 188 test methods: 127 for paint and related materials, 55 for paper and related products, and 6 for mattresses. As of December 31, 1984, 2 laboratories received on-site visits and received initial accreditation to perform selected test methods under the paint section of the LAP. The two laboratories are participating in a proficiency testing program operated by Collaborative Testing Services, Inc. as a requirement for accreditation under the LAP.

#### Film LAP

The LAP for photographic film was officially established on August 31, 1984. Several individuals are being considered for selection as technical experts to carry out on-site assessments and laboratory evaluations prior to accreditation.

#### **Laboratory Participation Summary**

The number of laboratories in the system, as of December 31, 1984, categorized by LAP participation is shown below.

	Number	The following table summarizes accreditation actions	
Laboratories in One LAP		that have occurred during calendar year 1984. Since	
Insulation (TIM)	25	some laboratories are accredited in more than one LAP,	
Concrete (CON)	30	•	
Carpet (CAR)	18	the number of accredited laboratories listed by LAP is	
Stove (STO)	8	greater than the number of laboratories in the system.	
Acoustics (ACO)	5		
Dosimetry (DOS)	19		
Commercial (CPL)	2	LAP Name	
Film (FLM)	0	TIM CON CAR STO ACO DOS CPL FLM TOTA	L
Laboratories in Two LAPs		Voluntary	
Insulation and Carpet	5	Terminations 2 10 1 0 0 0 0 0 13	
Insulation and Acoustics	3	New Laboratory	
Insulation and Stove	1	Accreditations 6 3 3 0 1 19 2 0 34	
Insulation and Concrete	1	Total Accredited	
		Labs by LAP 36 31 24 10 8 19 2 0 130	
Laboratories in Three LAPs		Change in Total	
Insulation, Carpet and Stove	1	Accredited	
Laboratories in More Than Three LAPs	0	Labs from December,	
Total	118	$1983 \dots + 4 - 7 + 2 0 + 1 + 19 + 2 0 + 21$	

# APPENDIX Administrative Procedures

#### **NVLAP Accreditation Process**

Accreditation is granted following successful completion of a process which includes submission of an application and payment of fees by the laboratory, on-site assessments, proficiency testing, resolution of any identified deficiencies, evaluation, and administrative review.

#### Criteria and Conditions of Accreditation

The criteria for accreditation address a laboratory's quality system, staff, facilities and equipment, calibration, test methods and procedures, records, and test reports. Under the conditions of accreditation, a laboratory must limit its test work to those areas where competence and capacity are available and must render test reports objectively and without bias. Evidence found to the contrary is grounds for adverse accreditation action (denial, suspension or revocation).

#### **On-site Assessment**

Before initial accreditation and about every 2 years thereafter, an on-site assessment of each laboratory is conducted to determine compliance with the criteria. Assessors use checklists so that each laboratory receives a fair assessment in relation to others. However, assessors have considerable latitude to make judgments about each laboratory's compliance with the criteria depending on their experience and the unique circumstances of each laboratory. The assessors are selected and assigned on the basis of their expertise in the testing techniques to be reviewed. The time needed to conduct an assessment varies, but 2 days is the norm. Every effort is made to conduct an assessment with as little disruption as possible to the normal operations of the laboratory. The assessors:

- Meet with management and supervisory personnel responsible for the laboratory's activities for which accreditation is being sought to acquaint the individuals involved and to set the assessment agenda.
- (2) Examine the quality system employed by the laboratory. The history of one or more samples from receipt to final issuance of test reports is traced. Assessors thoroughly review the laboratory's quality manual or equivalent, examine technician notebooks for records pertaining to the samples, check sample identification and tracking procedures, determine whether the appropriate testing conditions are maintained, and examine copies of completed test reports.
- (3) Review records of periodic internal audits, use of check samples or participation in round robin testing or other similar programs.

- (4) Review representative records including competency evaluations for all staff members who perform the tests, calibration/verification records, and sample control records.
- (5) Observe demonstrations of testing techniques and discuss them with the technical personnel to assure their understanding of the procedures.
- (6) Examine major equipment, apparatus, and facilities.

At the conclusion of the assessment, an exit briefing is held to discuss assessment findings with laboratory management and identify any deficiencies uncovered. A written summary of all identified deficiencies is left at the laboratory. Assessment forms and a written report are submitted to NBS for further evaluation. The laboratory is asked to respond within 30 days of the date of the exit briefing and provide documentation or certification that the specific deficiencies have been corrected or that specific actions are being taken. Any laboratory applying for initial accreditation may request a delay in responding.

If any deficiencies are noted at laboratories which are currently accredited, such deficiencies must be corrected within 30 days after the exit briefing or the laboratory may face possible suspension, revocation or expiration of its accreditation. When test equipment is identified as out-of-calibration, it must not be used until corrective action has been completed. Any deficiencies noted for corrective action will be subject to thorough review and verification during subsequent assessments.

#### **Monitoring Visits**

In addition to regularly scheduled assessments, monitoring visits can be made at any time during the accreditation period. Monitoring visits may occur for cause or on a random selection basis. These visits serve to verify reported changes in the laboratory's personnel, facilities, and operations or to explore possible reasons for poor performance in proficiency testing. The scope of a monitoring visit may range from checking a few designated items to a complete review. Failure to cooperate with NVLAP assessors may be grounds for adverse accreditation action. No additional fee is required for the monitoring visit since the cost is already factored into the fees.

#### **Proficiency Testing**

Proficiency testing is an integral part of the NVLAP accreditation process. While the existence of facilities, equipment, and personnel which satisfy the criteria indicates a laboratory's overall capability to obtain good results, an analysis of actual test results for certain test

methods is also necessary to determine if the overall capability does in fact produce the desired results. A laboratory's failure to participate fully in the conduct of required proficiency testing is grounds for adverse accreditation action.

#### **Evaluation**

Evaluation of a laboratory is conducted at NBS by technical experts chosen for their experience and knowledge of the test methods under evaluation. They review records on each applicant laboratory and base their evaluation on:

- (1) Information provided on the application;
- (2) On-site assessment reports;
- (3) Actions taken by the laboratory to correct deficiencies;
- (4) Results of proficiency testing; and
- (5) Information from any monitoring visits of the laboratory.

If the technical evaluation reveals additional deficiencies, written notification describing them will be made to the laboratory. The laboratory must respond within 30 days of such notification and provide documentation or certification that the specified deficiencies have been corrected. Clarification of some issues may be requested by telephone. All deficiencies must be corrected before accreditation can be granted or renewed.

#### **Technical Experts**

The technical experts (respected peers in their field) used as assessors and evaluators are selected through evaluation of their professional/academic achievements, experience in the field of testing, management awareness, potential for conflict-of-interest, and tact in dealing with people.

Assessors are selected to conduct an on-site assessment of a particular laboratory on the basis of how well their individual experience matches the type of testing to be assessed. The laboratory has the right to appeal the assignment of an assessor and may request an alternate.

Evaluators are selected to provide a second opinion, if necessary, and to review the records including the application, assessment report, deficiencies, corrections to deficiencies, and proficiency test results and, based on this record, to recommend whether accreditation should be granted.

#### **Administrative Review**

When the evaluation has been completed, NBS prepares an administrative recommendation that the laboratory either be granted or denied accreditation. This recommendation is based on a review of the evaluation and other records to ensure that all NVLAP technical, financial, and administrative obligations have been satisfied.

#### **Accreditation Actions**

The Director of the NBS Office of Product Standards Policy makes accreditation decisions.

**Recommended.** When accreditation is recommended, the recommendation forms the basis for granting accreditation. A certificate of accreditation is issued to the laboratory.

**Denial.** In cases where denial is recommended, the laboratory is notified of a proposal to deny accreditation and the reasons for the denial.

Appeal. When denial has been proposed, the laboratory may request a hearing, under 5 United States Code (U.S.C.) 556, within 30 days of the date of receipt of the notification. If a hearing is not requested, the denial becomes final upon the expiration of that 30-day period.

**Renewal.** Accreditation is granted annually or biennially with renewal occurring on the same anniversary date every year or every two years.

**Termination.** A laboratory may voluntarily terminate its accreditation by written request at any time. The accreditation certificate must be returned with the request. If a laboratory elects not to renew its accreditation, a notification of such intention should be forwarded to NBS in writing.

Suspension. If an accredited laboratory develops problems or deficiencies which are of a temporary nature, its accreditation may be suspended until such time as the deficiencies are resolved.

Revocation. In cases where a laboratory is found to have violated the terms of its accreditation, the accreditation can be revoked. The laboratory may, however, be given the option to voluntarily terminate accreditation. The laboratory has 30 days from the date of receipt of notice of proposed revocation in which it may appeal the proposed revocation by requesting a hearing. If a hearing is not requested, the revocation becomes final upon the expiration of that 30-day period. When revocation is final the laboratory must return its certificate of accreditation and cease to reference its NVLAP accreditation on any of its reports, other correspondence, or advertising.

#### **Public Notification**

Accreditation actions are published quarterly. A directory of accredited laboratories is published annually. The directory identifies the name and address of each laboratory, the scope of its accreditation, and the key contact person. The directory is widely distributed nationally and internationally.

Accredited laboratories are encouraged to publicize their accredited status. However, they must do so in such a way as not to imply product certification by NBS. A laboratory may cite its accredited status and use the NVLAP logo on reports, stationary, and in business and trade publications.

#### Establishment of New LAPs

Anyone may request a LAP by writing to the Director, NBS, ADMIN A1134, Gaithersburg, MD 20899. The letter must address the following items:

- (1) The scope of the LAP in terms of the products or testing services proposed for inclusion.
- (2) Specific identification of the applicable standards and test methods including appropriate designations, and the organizations or standards writing bodies having responsibility for them;
  - (3) A statement of need for the LAP including:
    - (i) Technical and economic reasons why the LAP would benefit the public interest.
    - (ii) Evidence of a national need to accredit testing laboratories for the specific scope beyond that served by an existing laboratory

- accreditation program in the public or private sector.
- (iii) An estimate of the number of laboratories that may seek accreditation.
- (iv) An estimate of the number and nature of the users of such laboratories.
- (4) A statement of the extent to which you are willing to support necessary developmental aspects of the LAP with funding and personnel.

If the request letter addresses the above items, NBS will publish a *Federal Register* notice of the receipt of a LAP request describing the scope of the requested LAP, and stating that anyone may submit comments on the need for the LAP to NBS. Assuming there is public support for such a LAP, the process of securing resources for its successful development can begin.

### ACCREDITED LABORATORIES AND TEST METHODS FOR WHICH THEY ARE ACCREDITED

NOTE: This section lists accredited laboratories in ascending order by NVLAP Lab Code Number. Indexes 1, 2, 3, and 4 are lists of laboratories by test method, state, and laboratory accreditation program (LAP) cross-referenced to NVLAP Lab Code Number.

**NVLAP LAB CODE 0101** 

# CERTAINTEED CORPORATION INSULATION GROUP, R & D LABORATORY

1400 Union Meeting Road, Blue Bell, PA 19422 Dr. W. Francis Olix Phone: 215-341-6713

NVLAP Code	Designation	Short Title
01/C02	HH-I-515	Corrosiveness; Cellulosic fiber (loose-fill)
	(para. 4.8.5 in D version,	
	Amendment 1)	
01/C03		California Energy Commission tests for insulating materials:
		Corrosiveness - Mineral fiber blankets and loose-fill
01/D01	ASTM C136	Sieve or screen analysis
01/D02	ASTM C167	Thickness and density; Blanket and batt
01/D08	ASTM C302	Density; Preformed pipe insulation
01/D09	ASTM C303	Density; Preformed block insulation
01/D13	ASTM C519	Density; Loose-fill (fibrous)
01/D25	HH-I-515	Moisture absorption;
	(para. 4.8.3 in D version,	Cellulosic fiber (loose-fill)
	Amendment 1)

850 Poplar Street, Pittsburgh, PA 15220 William H. Levelius Phone: 412-922-4000

#### Accreditation Renewal Date: October 1, 1985

NVLAP Code	Designation	Short Title
02/M01	ASTM C31	Making and Curing Concrete Test Specimens in the Field
02/M03	ASTM C172	Sampling Fresh Concrete
02/P01	ASTM C143	Slump of Portland Cement Concrete
02/W01	ASTM C138	Unit Weight, Yield, and Air Content (Gravimetric) of Concrete
02/A01	ASTM C231	Air Content of Freshly Mixed Concrete by the Pressure Method
02/S01	ASTM C39	Compressive Strength of Cylindrical Concrete Specimens
02/A02	ASTM C173	Air Content of Freshly Mixed Concrete by the Volumetric Method

**NVLAP LAB CODE 0203** 

### CAL MAT CO.

#### CONROCK DIVISION TESTING LABORATORY

P.O. Box 2950, Terminal Annex, Los Angeles, CA 90051 James Neal Van Nest Phone: 213-258-2777

#### Accreditation Renewal Date: January 1, 1986

NVLAP Code	Designation	Short Title
02/M01	ASTM C31	Making and Curing Concrete Test Specimens in the Field
02/M03	ASTM C172	Sampling Fresh Concrete
02/P01	ASTM C143	Slump of Portland Cement Concrete
02/W01	ASTM C138	Unit Weight, Yield, and Air Content (Gravimetric) of Concrete
02/A01	ASTM C231	Air Content of Freshly Mixed Concrete by the Pressure Method
02/S01	ASTM C39	Compressive Strength of Cylindrical Concrete Specimens
02/A02	ASTM C173	Air Content of Freshly Mixed Concrete by the Volumetric Method

**NVLAP LAB CODE 0205** 

# WEST VIRGINIA DEPT OF HIGHWAYS MATERIALS CONTROL, SOIL & TESTING

312 Michigan Avenue, Charleston, WV 25311 Thomas M. Dugan Phone: 304-348-3160

#### Accreditation Renewal Date: April 1, 1985

NVLAP Code	Designation	Short Title
02/M01	ASTM C31	Making and Curing Concrete Test Specimens in the Field
02/M03	ASTM C172	Sampling Fresh Concrete
02/P01	ASTM C143	Slump of Portland Cement Concrete
02/W01	ASTM C138	Unit Weight, Yield, and Air Content (Gravimetric) of Concrete
02/A01	ASTM C231	Air Content of Freshly Mixed Concrete by the Pressure Method
02/S01	ASTM C39	Compressive Strength of Cylindrical Concrete Specimens
02/A02	ASTM C173	Air Content of Freshly Mixed Concrete by the Volumetric Method

### R. W. SIDLEY, INC. QUALITY CONTROL LABORATORY

6900 Madison Road, Thompson, OH 44086 Lawrence McCune Phone: 216-298-3232

#### Accreditation Renewal Date: January 1, 1986

NVLAP Code	Designation	Short Title
02/M01	ASTM C31	Making and Curing Concrete Test Specimens in the Field
02/M03	ASTM C172	Sampling Fresh Concrete
02/P01	ASTM C143	Slump of Portland Cement Concrete
02/W01	ASTM C138	Unit Weight, Yield, and Air Content (Gravimetric) of Concrete
02/A01	ASTM C231	Air Content of Freshly Mixed Concrete by the Pressure Method
02/S01	ASTM C39	Compressive Strength of Cylindrical Concrete Specimens
02/A02	ASTM C173	Air Content of Freshly Mixed Concrete by the Volumetric Method

**NVLAP LAB CODE 0208** 

### **GULF COAST TESTING LABORATORY, INC.**

1205 North Tancahua Street, Corpus Christi, TX 78401 Doyne Reynolds Phone: 512-882-5411

#### Accreditation Renewal Date: January 1, 1986

NVLAP Code	Designation	Short Title
02/M01	ASTM C31	Making and Curing Concrete Test Specimens in the Field
02/M03	ASTM C172	Sampling Fresh Concrete
02/P01	ASTM C143	Slump of Portland Cement Concrete
02/W01	ASTM C138	Unit Weight, Yield, and Air Content (Gravimetric) of Concrete
02/A01	ASTM C231	Air Content of Freshly Mixed Concrete by the Pressure Method

02/A02	ASTM C173	Air Content of Freshly Mixed Concrete by the Volumetric Method

**NVLAP LAB CODE 0210** 

### INSTA-FOAM PRODUCTS, INC.

1500 Cedarwood Drive, Joliet, IL 60435 Kenneth A. Pugh Phone: 815-741-6851

NVLAP Code	Designation	Short Title
01/D15	ASTM D756	Weight and shape changes; Accelerated service (proc. A); Plastics
01/D16	ASTM D756	Weight and shape changes; Accelerated service (proc. B); Plastics
01/D17	ASTM D756	Weight and shape changes; Accelerated service (proc. E); Plastics
01/D18	ASTM D1622	Apparent density; Rigid cellular plastics
01/D20	ASTM D2126	Response to thermal and humid aging (proc. D); Rigid cellular plastics
01/D22	ASTM D2126	Response to thermal and humid aging (proc. F); Rigid cellular plastics
01/D23	ASTM D2842	Water absorption; Rigid cellular plastics
01/D27	ASTM D2126	Response to thermal and humid aging (proc. C); Rigid cellular plastics
01/D28	ASTM D2126	Response to thermal and humid aging (proc. G); Rigid cellular plastics
01/S11	ASTM D1621	Compressive properties; Rigid cellular plastics (proc. A-Crosshead)
01/T05	ASTM C335	Thermal conductivity; Pipe insulation
01/T06	ASTM C518	Thermal transmission properties; Heat flow meter
01/V04	ASTM E96	Water vapor transmission; Thin sheets (proc. A)

#### CONSTRUCTION MATERIALS CONSULTANTS, INC.

1000 West Fillmore Street, Colorado Springs, CO 80907 Ivan A. Vanaken Phone: 303-632-2588

Accreditation Renewal Date: July 1, 1985

NVLAP Code	Designation	Short Title
02/M01	ASTM C31	Making and Curing Concrete Test Specimens in the Field
02/M03	ASTM C172	Sampling Fresh Concrete
02/P01	ASTM C143	Slump of Portland Cement Concrete
02/W01	ASTM C138	Unit Weight, Yield, and Air Content (Gravimetric) of Concrete
02/A01	ASTM C231	Air Content of Freshly Mixed Concrete by the Pressure Method
02/S01	ASTM C39	Compressive Strength of Cylindrical Concrete Specimens
02/A02	ASTM C173	Air Content of Freshly Mixed Concrete by the Volumetric Method

**NVLAP LAB CODE 0216** 

#### UNITED STATES GYPSUM COMPANY, RESEARCH CENTER

700 North Highway 45, Libertyville, IL 60048 William F. Porter Phone: 312-362-9797

Accreditation Renewal Date: July 1, 1985

NVLAP Code Designation Short Title

01/T06 ASTM C518 Thermal transmission properties; Heat flow meter

**NVLAP LAB CODE 0218** 

#### APACHE BUILDING PRODUCTS COMPANY

2025 East Linden Avenue, Linden, NJ 07036 Dennis W. Rosato Phone: 201-486-6723

Accreditation Renewal Date: October 1, 1985

NVLAP Code	Designation	Short Title
01/D18	ASTM D1622	Apparent density; Rigid cellular plastics
01/D21	ASTM D2126	Response to thermal and humid aging (proc. E); Rigid cellular plastics
01/D27	ASTM D2126	Response to thermal and humid aging (proc. C); Rigid cellular plastics
01/S11	ASTM D1621	Compressive properties; Rigid cellular plastics (proc. A-Crosshead)
01/T06	ASTM C518	Thermal transmission properties; Heat flow meter

**NVLAP LAB CODE 0220** 

#### STRATTON LABORATORIES

Highway 61, South, P.O. Box 1007, Cartersville, GA 30120 Jack R. Kilgore Phone: 404-382-9350

Accreditation Renewal Date: October 1, 1985

NVLAP Code	Designation	Short Title
03/S01	ASTM D1335	Tuft Bind of Floor Coverings
·	Federal Test Method	
	Standard 191-5100	Textile Test Method - Breaking Strength
	191-5950	Textile Test Method - Delamination
03/F03	DoC FF 1-70	Methenamine Pill Test
03/F04	ASTM E648	Radiant Panel (Carpet)

#### SALEM CARPET LABORATORY

P.O. Box 10, Chatsworth, GA 30736 Michael A. Corbin Phone: 404-935-2241

Accreditation Renewal Date: July 1, 1985

NVLAP Code	Designation	Short Title
03/C01	AATCC 16E	Colorfastness to Light (Xenon Arc)
03/C02	AATCC 8	Colorfastness to Crocking
03/D01	ASTM D418	Pile Yarn Floor Covering Construction
		Pile Weight - Uncoated (Section 8)
		Pile Weight - Coated (Section 9)
		Pile Thickness - (Sections 10 & 11)
		Tuft Height - (Section 13)
03/D02	DDD-C-95A	Shrinkage
03/S01	ASTM D1335	Tuft Bind of Floor Coverings
	Federal Test Method	
	Standard 191-5100	Textile Test Method - Breaking Strength
	191-5950	Textile Test Method - Delamination
03/F03	DoC FF 1-70	Methenamine Pill Test
03/F04	ASTM E648	Radiant Panel (Carpet)

**NVLAP LAB CODE 0223**

		Condensation Type) for Exposure of Nonmetallic Materials

#### UNDERWRITERS LABORATORIES INC.

1285 Walt Whitman Road, Melville, NY 11747 R. W. Miller Phone: 516-271-6200

#### Accreditation Renewal Date: October 1, 1985

<b>NVLAP</b> Code	Designation	Short Title
03/F03	DoC FF 1-70	Methenamine Pill Test
03/F04	ASTM E648	Radiant Panel (Carpet)

**NVLAP LAB CODE 0501** 

### BALTIMORE GAS & ELECTRIC COMPANY, CALVERT CLIFFS NUCLEAR POWER PLANT NUCLEAR POWER DEPARTMENT, DOSIMETRY UNIT RADIATION SAFETY SECTION

Lusby, MD 20657

**Eugene T. Reimer Phone: 301-269-4716** 

Accreditation Renewal Date: October 1, 1986

This facility has been evaluated and deemed competent to process the radiation dosimeter listed below through employing a Panasonic Automatic reader model UD710A and Panasonic Manual reader UD702A.

This facility is accredited to process the following dosimeter by virtue of actual demonstration of compliance with ANSI-N13.11-1983 through testing.

Panasonic TLD model UD802 for ANSI-N13.11 categories I, II, III, IV, V, VI, VII, VIII.

**NVLAP LAB CODE 0503** 

### MALLINCKRODT DIAGNOSTICS, INC.

2703 Wagner Place, Maryland Heights, MO 63043 Mark Doruff Phone: 314-344-3981

Accreditation Renewal Date: October 1, 1986

This facility has been evaluated and deemed competent to process the radiation dosimeter listed below through employing a Harshaw Automatic readers model 2000B and 2000D.

This facility is accredited to process the following dosimeter by virtue of actual demonstration of compliance with ANSI-N13.11-1983 through testing.

Harshaw TLD model 100 for ANSI-N13.11 category VII.

### NAVAL MEDICAL COMMAND NATIONAL CAPITAL REGION RADIATION SAFETY DEPARTMENT

Bethesda, MD 20814

Eric E. Kearsley Phone: 202-295-5414

#### Accreditation Renewal Date: October 1, 1986

This facility has been evaluated and deemed competent to process the radiation dosimeters listed below through employing a Harshaw Automatic reader model 2271 and Manual film processing using a Macbeth densitometer.

This facility is accredited to process the following dosimeter by virtue of actual demonstration of compliance with ANSI-N13.11-1983 through testing.

Harshaw TLD Albedo (1 TLD 600, 1 TLD 700) for ANSI-N13.11 Categories II, IV, VIII.

Film Badge (Kodak Type 3) for ANSI-N13.11 Categories II, III, IV, V, VI, VII.

**NVLAP LAB CODE 0506** 

# SOUTHERN CALIFORNIA EDISON SAN ONOFRE NUCLEAR GENERATING STATION

P.O. Box 128, San Clemente, CA 92672 Kathryn H. Swoope Phone: 714-492-7700

#### Accreditation Renewal Date: October 1, 1986

This facility has been evaluated and deemed competent to process the radiation dosimeter listed below through employing a Panasonic Automatic reader model UD710A.

This facility is accredited to process the following dosimeter by virtue of actual demonstration of compliance with ANSI-N13.11-1983 through testing.

Panasonic TLD model UD802-AS2 for ANSI-N13.11 categories I, II, III, IV, V, VI, VII.

**NVLAP LAB CODE 0507** 

# U.S. ENVIRONMENTAL PROTECTION AGENCY NUCLEAR RADIATION ASSESSMENT DIVISION

P.O. Box 15027, Las Vegas, NV 89114 Jaci L. Hopper Phone: 702-798-2320

#### Accreditation Renewal Date: October 1, 1986

This facility has been evaluated and deemed competent to process the radiation dosimeter listed below through employing a Harshaw Automatic reader model 2271.

This facility is accredited to process the following dosimeter by virtue of actual demonstration of compliance with ANSI-N13.11-1983 through testing.

Harshaw TLD Model TL-200 for ANSI-N13.11 categories II, IV.

# NEW YORK POWER AUTHORITY INDIAN POINT UNIT NO. 3 NUCLEAR POWER PLANT

P.O. Box 215, Buchanan, NY 10511 Thomas Labenski Phone: 914-739-8200

#### Accreditation Renewal Date: October 1, 1986

This facility has been evaluated and deemed competent to process the radiation dosimeter listed below through employing a Panasonic Automatic reader model UD710B and Panasonic Manual reader UD702E.

This facility is accredited to process the following dosimeter by virtue of actual demonstration of compliance with ANSI-N13.11-1983 through testing.

Panasonic TLD model UD806AQ for ANSI-N13.11 categories I, II, III, IV, V, VI, VII.

**NVLAP LAB CODE 0509** 

#### NAVAL RESEARCH LABORATORY

Code 6073, Washington, DC 20375 Kirk J. King Phone: 202-767-2232

#### Accreditation Renewal Date: January 1, 1987

This facility has been evaluated and deemed competent to process the radiation dosimeter listed below through employing a Harshaw Automatic reader model 2271.

This facility is accredited to process the following dosimeter by virtue of actual demonstration of compliance with ANSI-N13.11-1983 through testing.

NRL Radiation Badge for ANSI-N13.11 categories II, III, IV, VI, VIII.

**NVLAP LAB CODE 0510** 

# GENERAL PUBLIC UTILITIES NUCLEAR CORPORATION DIVISION OF RADIOLOGICAL & ENVIRONMENTAL CONTROLS

Route 441 South, P.O. Box 480, Middletown, PA 17057 O. Ronald Perry Phone: 717-948-8595

#### Accreditation Renewal Date: October 1, 1986

This facility has been evaluated and deemed competent to process the radiation dosimeter listed below through employing a Panasonic Automatic reader model UD710.

This facility is accredited to process the following dosimeter by virtue of actual demonstration of compliance with ANSI-N13.11-1983 through testing.

Panasonic TLD model UD802-2 for ANSI-N13.11 categories I, II, III, IV, V, VI, VII, and Panasonic TLD model UD802-2N for ANSI-N13.11 categories IV, VIII.

# NEW YORK POWER AUTHORITY JAMES A. FITZPATRICK NUCLEAR POWER PLANT

P.O. Box 41, Lycoming, NY 13093
Dr. David A. Dooley Phone: 315-342-3840

Accreditation Renewal Date: October 1, 1986

This facility has been evaluated and deemed competent to process the radiation dosimeter listed below through employing a Panasonic Automatic reader model UD710A.

This facility is accredited to process the following dosimeter by virtue of actual demonstration of compliance with ANSI-N13.11-1983 through testing.

Panasonic TLD model UD801 for ANSI-N13.11 categories II, IV, VI, VII.

**NVLAP LAB CODE 0512** 

#### RADIATION DETECTION COMPANY

162 Wolfe Road, P.O. Box 1414, Sunnyvale, CA 94088 Richard H. Holden Phone: 408-735-8700

#### Accreditation Renewal Date: October 1, 1986

This facility has been evaluated and deemed competent to process the radiation dosimeters listed below through employing (1) modified CON RAD readers; (2)Teledyne 7100 reader; (3) Teledyne 7300 reader; (4) Harshaw 3000 reader; (5)Victoreen 2800 reader; (6) by manual film processing and reading on a Macbeth TD502 densitometer; or (7) Tracketch, NTA manual optical readers.

This facility is accredited to process the following dosimeters by virtue of actual demonstration of compliance with ANSI-N13.11-1983 through testing.

Designation	Process	ANSI N13.11	Categories
Hi Energy	TLD	1	III, IV
Beta	TLD	1,3*	V, VII
Lo Energy	TLD	1,3*	I, III, VI
TLD	Albedo	3*,6	VIII
Film	XBG	6	I, II, III, IV, V, VI, VII
Film	XBGN	6,7	VIII
Neutron	Tracketch	7	VIII

<sup>\*</sup> Processes listed above 2, 4, and 5 are considered functionally acceptable as substitutes which can be used in lieu of process 3 as listed above.

**NVLAP LAB CODE 0515** 

# EBERLINE SERVICES DIVISION DOSIMETRY DEPARTMENT

P.O. Box 2108, Santa Fe, NM 87501 Nels Johnson Phone: 505-345-9931

#### Accreditation Renewal Date: October 1, 1986

This facility has been evaluated and deemed competent to process the radiation dosimeter listed below through employing a Eberline Manual reader TLR-6.

This facility is accredited to process the following dosimeter by virtue of actual demonstration of compliance with ANSI-N13.11-1983 through testing.

Eberline TLD (2 or 3 Harshaw TLD 100 chips) for ANSI-N13.11 categories I, II, III, IV, V, VI, VII, VIIII.

# CAROLINA POWER & LIGHT COMPANY HARRIS ENERGY & ENVIRONMENTAL CENTER

Route 1, Box 327, New Hill, NC 27562 Stephen A. Browne Phone: 919-362-3212

#### Accreditation Renewal Date: October 1, 1986

This facility has been evaluated and deemed competent to process the radiation dosimeter listed below through employing a Panasonic Automatic reader model UD710A and Panasonic Manual reader UD702E.

This facility is accredited to process the following dosimeter by virtue of actual demonstration of compliance with ANSI-N13.11-1983 through testing.

Panasonic TLD model UD802AQ for ANSI-N13.11 categories I, II, III, IV, V, VI, VII, VIII.

The following sites are included in the accreditation as sub-facilities of the above listed main facility. These sub-facilities are accredited by virtue of using identical equipment and procedures as indicated above.

Robinson Nuclear Plant, Hartsville, South Carolina Brunswick Nuclear Plant, Southport, South Carolina

**NVLAP LAB CODE 0518** 

#### R.S. LANDAUER JR. & COMPANY

Glenwood Science Park, 2 Science Park, Glenwood, IL 60425 Craig Yoder Phone: 312-755-7000

#### Accreditation Renewal Date: October 1, 1986

This facility has been evaluated and deemed competent to process the radiation dosimeters listed below through employing (1) automatic film reader Tech/Ops model 1; (2) Harshaw Atlas Hotgas reader; (3) Harshaw 2271 reader; (4) NTA/Polycarbonate /CR-39 manual optical readers; or (5) manual densitometers X-Rite, Tech/Ops model 301, Macbeth model TD504.

This facility is accredited to process the following dosimeter by virtue of actual demonstration of compliance with ANSI-N13.11-1983 through testing.

Landauer designation	Film Process	ANSI N13.11	Category
G-Film	"GARDRAY"	1,5	I, H, III, IV, V, VI, VII
P-G	badge plus NTA	1,4,5	VIII
A-G	badge plus polycarbonate	1,4	VIII
TLD			
L-4 chip	"GARDRAY"	2	I, II, III, IV, V, VI, VII
D-3 Harshaw	700 chips	3	II, IV, V, VII
I-Neutrak	ER	3,4	VIII

The facility is accredited to process the following dosimeters which have been deemed functionally acceptable by virtue of using identical techniques and equipment to process combinations of elements demonstrated above.

Landauer designation B-G badge C-G badge P-G badge plus H-G badge plus A-G badge plus J-G badge plus Y-G badge plus R-G badge plus Q-DEX-RAY	Film Process plus CR-39 plus CR-39 and Cadmium NTA NTA and Cadmium polycarbonate polycarbonate and Cadmium Cadmium ER	ANSI N13.11 1,4,5 1,4,5 1,4,5 1,4,5 1,4,5 1,4,5 1,4,5 1,4,5 1,4,5 1,3,4,5 1,4,5	Category I through VIII I through VIII I, II, III, IV, V, VI, VII, VIII I through VIII I, II, III, IV, V, VI, VII, VIII I through VII I, III I, III I, III, III, IV, V, VI, VII, VI
TLD F-L badge plus -L badge plus	CR-39	2,4	I through VIII
	polycarbonate	2,4	I through VIII

Landauer designation	Film Process	ANSI N13.11	Category
-L badge plus	ER	2,3,4	I through VIII
T-2	chip	2	II, IV, V, VII

The following sites are included in the accreditation as sub-facilities of the above listed main facility.

The following sub-facilities are accredited to process the Landauer "D" badge employing a Harshaw 2271 automatic TLD reader for ANSI N13.11 categories II, IV, V, VII which have been deemed functionally acceptable by virtue of using identical techniques and procedures as demonstrated above for the items specified.

R.S. Landauer, Jr. & Company Nuclear Station System (NSS) sites at:

Boston Edison Company, Pilgrim Station, Plymouth, Massachusetts Alabama Power, Farley Nuclear Plant, Ashford, Alabama

The following sub-facilities are accredited to perform limited volume, emergency response processing employing either a Harshaw 3000 manual reader or manual film processing techniques for the following badges:

G-Film	"GARDRAY"	ANSI N13.11	Categories I, II, III, IV, V, VI, VII
L-TLD 4 chip	"GARDRAY"	ANSI N13.11	Categories I, II, III, IV, V, VI, VII
T-TLD 2 chip		ANSI N13.11	Categories II, IV, V, VII

R. S. Landauer, Jr. & Company Offices: El Sequndo, California; Houston, Texas; Burlington, Massachusetts; and East Brunswick, New Jersey.

**NVLAP LAB CODE 0519** 

# HOUSTON LIGHTING & POWER COMPANY, MANAGING PARTNER SOUTH TEXAS PROJECT ELECTRIC GENERATING STATION

P.O. Box 1700, Houston, TX 77059 Gene R. Jarvela Phone: 512-972-3651

Accreditation Renewal Date: October 1, 1986

This facility has been evaluated and deemed competent to process the radiation dosimeter listed below through employing a Panasonic Automatic reader model UD710A.

This facility is accredited to process the following dosimeter by virtue of actual demonstration of compliance with ANSI-N13.11-1983 through testing.

Panasonic TLD Model UD801 for ANSI-N13.11 category IV.

**NVLAP LAB CODE 0520** 

# VIRGINIA ELECTRIC AND POWER COMPANY NORTH ANNA POWER STATION

P.O. Box 402, Mineral, VA 23117 Russell R. Irwin Phone: 703-894-5151

#### Accreditation Renewal Date: October 1, 1986

This facility has been evaluated and deemed competent to process the radiation dosimeter listed below through employing Teledyne Automatic readers model 9100 and 9150, and Teledyne Manual readers model 8300 and 8310.

This facility is accredited to process the following dosimeter by virtue of actual demonstration of compliance with ANSI-N13.11-1983 through testing.

Teledyne TLD model BP3 for ANSI-N13.11 categories II, IV, V, VII.

# CONSUMERS POWER COMPANY PERSONNEL DOSIMETRY LABORATORY

1945 Parnall Road, Jackson, MI 49201 Theodore Allen Phone: 517-788-2340

Accreditation Renewal Date: October 1, 1986

This facility has been evaluated and deemed competent to process the radiation dosimeter listed below through employing a Teledyne Automatic reader model 9100.

This facility is accredited to process the following dosimeters by virtue of actual demonstration of compliance with ANSI-N13.11-1983 through testing.

Teledyne TLD model BG for ANSI-N13.11 categories II, IV, V, VII.

Teledyne TLD model BGN for ANSI-N13.11 category VIII.

**NVLAP LAB CODE 0523** 

#### VIRGINIA ELECTRIC & POWER COMPANY SURRY POWER STATION

P.O. Box 315, Surry, VA 23883

Dean Densmore Phone: 804-357-3184

Accreditation Renewal Date: January 1, 1987

This facility has been evaluated and deemed competent to process the radiation dosimeter listed below through employing Teledyne Automatic readers model 9100 and 9150, and Teledyne Manual reader model 8300.

This facility is accredited to process the following dosimeter by virtue of actual demonstration of compliance with ANSI-N13.11-1983 through testing.

Teledyne TLD model PB3 for ANSI-N13.11 categories II, IV, V, VII.

**NVLAP LAB CODE 0524** 

## YANKEE ATOMIC ELECTRIC COMPANY

1671 Worcester Road, Framingham, MA 01701 Stephen T. Bard Phone: 617-872-8100

Accreditation Renewal Date: October 1, 1986

This facility has been evaluated and deemed competent to process the radiation dosimeter listed below through employing a Harshaw Automatic reader model 2271.

This facility is accredited to process the following dosimeter by virtue of actual demonstration of compliance with ANSI-N13.11-1983 through testing.

Harshaw TLD model BGN for ANSI-N13.11 categories I, II, III, IV, V, VI, VII, and VIII.

**NVLAP LAB CODE 0526** 

# KANSAS GAS AND ELECTRIC COMPANY WOLF CREEK GENERATING STATION

P.O. Box 309, Burlington, KS 66839 Mike Nichols Phone: 316-364-8831

Accreditation Renewal Date: January 1, 1987

This facility has been evaluated and deemed competent to process the radiation dosimeter listed below through employing a Panasonic Automatic reader model UD710A and manual reader 702E.

This facility is accredited to process the following dosimeter by virtue of actual demonstration of compliance with ANSI-N13.11-1983 through testing.

Panasonic TLD model UD802 for ANSI-N13.11 categories II, IV, V, VII, VIII.

# Index 4. Test Methods Available Under Each LAP and NVLAP Code Numbers of Laboratories Accredited for those Test Methods

This index provides a cross reference of accredited laboratories with test methods under each LAP. Laboratory code numbers under each test method refer to the laboratories for which the name, address, primary contact, phone number, and list of accredited test methods are identified in the Directory.

#### INSULATION LAP-CORROSIVENESS TEST METHODS

01/C01	ASTM C739	0109, 0116
01/C02	HH-I-515	0101, 0106, 0107, 0109, 0115, 0116, 0120
01/C03	California Energy	Commission tests for insulating materials: Corrosiveness
		0101, 0109

#### INSULATION LAP-DIMENSION, STABILITY, AND DENSITY TEST METHODS

01/D01	ASTM C136	0101, 0109, 0116
01/D02	ASTM C167	0101, 0104, 0109, 0116, 0123, 0124, 0126, 0127, 0128, 0129, 0130, 0248
01/D03	ASTM C209	0109, 0111, 0116, 0123
01/D04	ASTM C209	0109, 0111, 0116, 0123
01/D05	ASTM C209	0109, 0111, 0116, 0123
01/D06	ASTM C209	0109, 0111, 0116, 0123
01/D07	ASTM C272	0109, 0111
01/D08	ASTM C302	0101, 0109, 0116, 0123, 0142, 0248
01/D09	ASTM C303	0101, 0109, 0111, 0116, 0123, 0124, 0126, 0127, 0129, 0130, 0248, 0250
01/D11	ASTM C356	0109, 0123, 0248
01/D12	ASTM C411	0109, 0123, 0248
01/D13	ASTM C519	0101, 0104, 0109, 0116, 0117, 0123, 0248
01/D14	ASTM C520	0116, 0250
01/D15	ASTM D756	0109, 0210
01/D16	ASTM D756	0109, 0210
01/D17	ASTM D756	0109, 0210
01/D18	ASTM D1622	0103, 0107, 0109, 0116, 0210, 0218

#### INSULATION LAP-VAPOR BARRIER PROPERTIES TEST METHODS

01/D19	ASTM D2126	0109
01/D20	<b>ASTM D2126</b>	0109, 0111, 0210
01/D21	<b>ASTM D2126</b>	0103, 0106, 0109, 0111, 0175, 0199, 0218
01/D22	ASTM D2126	0109, 0210
01/D23	ASTM D2842	0103, 0109, 0210
01/D24	ASTM C739	0109, 0116
01/D25	HH-I-515	0101, 0107, 0109, 0115, 0116, 0120, 0122, 0199
01/D26	HH-I-515	0101, 0107, 0109, 0115, 0116, 0117, 0120, 0122
01/D27	<b>ASTM D2126</b>	0103, 0106, 0109, 0210, 0218
01/D28	ASTM D2126	0106, 0109, 0175, 0199, 0210
01/D29	California Energy	Commission tests for insulating materials:
		0109

#### **INSULATION LAP-FIRE PROPERTIES TEST METHODS**

01/F01	TAPPI T461	0101, 0109, 0123
01/F02	ASTM E84	0105, 0106, 0109, 0111, 0115, 0116, 0117, 0123, 0151, 0199
01/F05	ASTM E136	0101, 0106, 0109, 0123, 0142
01/F06	ASTM C739	0116
01/F07	HH-I-515	0101, 0105, 0106, 0109, 0115, 0116, 0117, 0120, 0122, 0151, 0199, 0251

Laboratories accredited by the National Voluntary Laboratory Accreditation Program (NVLAP) are identified along with the specific test methods for which they are accredited. The current status of existing accreditation programs is given for laboratories that test thermal insulation, freshly mixed concrete, carpet, wood burning stoves, paint, and personnel radiation dosimeters, and that provide acoustical testing services. Indexes are provided for searching the Directory for laboratories accredited in specific testing areas or for specific test methods.

#### **Periodical**

Journal of Research—The Journal of Research of the National Bureau of Standards reports NBS research and development in those disciplines of the physical and engineering sciences in which the Bureau is active. These include physics, chemistry, engineering, mathematics, and computer sciences. Papers cover a broad range of subjects, with major emphasis on measurement methodology and the basic technology underlying standardization. Also included from time to time are survey articles on topics closely related to the Bureau's technical and scientific programs. As a special service to subscribers each issue contains complete citations to all recent Bureau publications in both NBS and non-NBS media. Issued six times a year.

### Nonperiodicals

Monographs—Major contributions to the technical literature on various subjects related to the Bureau's scientific and technical activities.

Handbooks—Recommended codes of engineering and industrial practice (including safety codes) developed in cooperation with interested industries, professional organizations, and regulatory bodies.

**Special Publications**—Include proceedings of conferences sponsored by NBS, NBS annual reports, and other special publications appropriate to this grouping such as wall charts, pocket cards, and bibliographies.

Applied Mathematics Series—Mathematical tables, manuals, and studies of special interest to physicists, engineers, chemists, biologists, mathematicians, computer programmers, and others engaged in scientific and technical work.

National Standard Reference Data Series—Provides quantitative data on the physical and chemical properties of materials, compiled from the world's literature and critically evaluated. Developed under a worldwide program coordinated by NBS under the authority of the National Standard Data Act (Public Law 90-396). NOTE: The Journal of Physical and Chemical Reference Data (JPCRD) is published quarterly for NBS by the American Chemical Society (ACS) and the American Institute of Physics (AIP). Subscriptions, reprints, and supplements are available from ACS, 1155 Sixteenth St., NW, Washington, DC 20056.

**Building Science Series**—Disseminates technical information developed at the Bureau on building materials, components, systems, and whole structures. The series presents research results, test methods, and performance criteria related to the structural and environmental functions and the durability and safety characteristics of building elements and systems.

**Technical Notes**—Studies or reports which are complete in themselves but restrictive in their treatment of a subject. Analogous to monographs but not so comprehensive in scope or definitive in treatment of the subject area. Often serve as a vehicle for final reports of work performed at NBS under the sponsorship of other government agencies.

**Voluntary Product Standards**—Developed under procedures published by the Department of Commerce in Part 10, Title 15, of the Code of Federal Regulations. The standards establish nationally recognized requirements for products, and provide all concerned interests with a basis for common understanding of the characteristics of the products. NBS administers this program as a supplement to the activities of the private sector standardizing organizations.

**Consumer Information Series**—Practical information, based on NBS research and experience, covering areas of interest to the consumer. Easily understandable language and illustrations provide useful background knowledge for shopping in today's technological marketplace.

Order the above NBS publications from: Superintendent of Documents, Government Printing Office, Washington, DC 20402.

Order the following NBS publications—FIPS and NBSIR's—from the National Technical Information Service, Springfield, VA 22161.

Federal Information Processing Standards Publications (FIPS PUB)—Publications in this series collectively constitute the Federal Information Processing Standards Register. The Register serves as the official source of information in the Federal Government regarding standards issued by NBS pursuant to the Federal Property and Administrative Services Act of 1949 as amended, Public Law 89-306 (79 Stat. 1127), and as implemented by Executive Order 11717 (38 FR 12315, dated May 11, 1973) and Part 6 of Title 15 CFR (Code of Federal Regulations).

NBS Interagency Reports (NBSIR)—A special series of interim or final reports on work performed by NBS for outside sponsors (both government and non-government). In general, initial distribution is handled by the sponsor; public distribution is by the National Technical Information Service, Springfield, VA 22161, in paper copy or microfiche form.
