

NEW YORK.

MEMORIAL

OF

INHABITANTS OF ONTARIO COUNTY,

On the state of the Currency.

MAY 19, 1834.

Read, and laid upon the table.

Mr. Dickson submitted the following resolutions:

Resolved, That the annexed memorial be referred to the Committee of Ways and Means, with instructions to report to this House the two following resolutions:

1. *Resolved*, That the reasons assigned by the Secretary of the Treasury for the removal of the money of the United States, deposited in the Bank of the United States and its branches, communicated to Congress the 4th December, 1833, are unsatisfactory and insufficient.

2. *Resolved*, That the President in the late Executive proceeding in relation to the public revenue, has assumed upon himself authority and power not conferred by the constitution and laws, but in derogation of both.

To the honorable the Senate and House of Representatives in Congress assembled:

The memorial of the undersigned, farmers, mechanics, merchants, and others of the county of Ontario, New York,

RESPECTFULLY SHOWETH:

That your memorialists, in common with their fellow citizens, whose petitions for relief have been laid before your honorable bodies, are laboring under the embarrassments so generally existing throughout our country, produced by some sudden and powerful cause, which, at a time of unexampled prosperity, has operated to affect most injuriously our commercial, manufacturing, and, of consequence, our agricultural interests. That the disastrous effects of that cause upon these great interests, are severely felt by all who are engaged in pursuits requiring any degree of credit for their successful prosecution; and are seen in the general stagnation of business of every kind, the absence of a circulating medium, the reduced price of lands and their products, the number of laborers thrown out of employment, and the breaking up or suspension of ordinary facilities in

the important and increasing transactions between this section of country and the more commercial places on our seaboard. That your memorialists inhabit a district of western New York, essentially agricultural, inferior to none in fertility of soil, and in advantages furnished by nature and art, that induce the employment of capital, and stimulate to industry and enterprise. That the great amount of their surplus productions exchanged for the merchandise of our Atlantic cities, has created an intercourse and business relations reciprocal and beneficial, and connected them so intimately with the general operations of trade in this and other States, that any sudden change in the money market at one point, is felt like an electric shock through the whole system. That your memorialists are experiencing to an alarming extent the evils flowing from the present unnatural state of things, and they look in vain for its cause in any failure of the earth to "yield her increase," or in any adversity growing out of the external trade or domestic affairs of the country. All these were in the full tide of success, and all interests partaking of a season of unusual prosperity, when, suddenly, what was active became paralyzed, the public mind agitated with fear for the future, and confidence in the stability of credit, and in the security of property, fearfully impaired.

In the absence of other causes that could produce such fatal effects upon the common interests and prospects of the people, your memorialists are constrained to ascribe the existing difficulties to the unfortunate change which has taken place in the relations hitherto subsisting between the Government and the Bank of the United States, by the measure of the Executive, who "assumed the responsibility" of removing the public moneys from that institution. The effect of that measure upon the State banks, has been, in the opinion of your memorialists, to abridge their operations, and consequently to embarrass all classes for whose accommodation they were established. Every branch of industry has been checked, property depreciated, and the general confidence disturbed. That while it is not the purpose of your memorialists to discuss the merits of the unhappy breach between the Executive and the Bank of the United States, they would respectfully express their concurrence in the opinion tested by past and present experience, that a National Bank, properly constituted, is an essential agent in the fiscal operations of our Government, salutary and friendly in its influence upon State banks, indispensable to the preservation of a sound and stable currency, and calculated to equalize the value of property, money, and labor, in all sections of our extended country.

That Congress, in their wisdom, will adopt some speedy measure that will restore confidence among the moneyed institutions and the people, and relieve the country from the pervading pressure and distress, is the earnest prayer of their memorialists.
